Modern Applications of Austrian Thought Jürgen G.

Backhaus, 2007-05-07 Austrian economics is often criticized as being hostile to empirical research and seen purely as an ideology. In contrast, the purpose of this book is to show that Austrian economics provides an interesting approach to most conceivable subjects in economics. Edited by Jürgen G. Backhaus, this comprehensive volume includes Austrian analysis of health economics, labour economics, taxation, business cycle theory, property rights. Contributors include Roger Koppl, Bart Nooteboom, Larry Moss, Dick Wagner, and Gerrit Meijer, and this significant book will prove invaluable to students of economics and will make interesting reading for applied economists in any area of application.

Entrepreneurship and the Market Process Arielle John, Diana W. Thomas, 2020-12-14 What is the significance of entrepreneurship in an economy? Scholars have argued that when the market is viewed as a process of perpetual adjustment to various forces and not as a set of end state prices and quantities, simply arriving at the role of the entrepreneur comes to the fore. What then are fruitful ways to conceive of the phenomenon of entrepreneurship? How do entrepreneurs both respond to and shape larger forces in the economy? In what ways can political institutions and government regulation shape the decisions made by entrepreneurs and their responsiveness to consumers? How does the cultural environment influence the types of opportunities that an entrepreneur will notice and act on? Finally, is entrepreneurial behavior strictly limited to activity we see in the market? This edited volume, comprised of chapters by scholars and students studying from the disciplines of sociology and economics, examines entrepreneurship theoretically and applied to various cases. It provides an overview of the economic literature on entrepreneurship and puts forth a framework for understanding the market process as well as the policy implications of government intervention and cultural considerations in the market. It will be of use to any scholars, students, practitioners, or policymakers interested in entrepreneurship.

Money, Time and Rationality in Max Weber Stephen Parsons, 2013-12-19 This unique study into the roots of Max Weber's Political Economy is an intriguing read and a valuable contribution to the Weberian literature. Parsons argues that Weber's analysis is highly influenced by the Austrian School of Economics and the relationship between his critique of centrally planned economies and that of Mises.

An Entrepreneurial Theory of the Firm Frederic Sautet, 2000-05-11 This original provocative work encompasses a wealth of existing literature and leads it in a new direction. It will inspire economic scholars particularly within the fields of Austrian economics and the theory of the firm.

The Elgar Companion to Economics and Philosophy John Bryan Davis, Alain Marciano, Jochen Runde, 2005-01-01 There are many first-rate contributions here. Those contributions make this collection valuable especially to readers who are already knowledgeable about the various areas in which the interests of philosophers and economists overlap. Daniel M. Hausman, *Journal of Economic Methodology*. The Elgar Companion To Economics and Philosophy is a very good read. Every library should buy it now. John King, *History of Economics Review*. The volume collects articles surveying developments in such related fields as economic methodology, ethics, epistemology, and social ontology. Many of the articles are forward-looking and

as such constitute substantive and original and at times provocative contributions to the literature The volume as a whole is a success the editors are to be congratulated for their efforts Bruce J Caldwell University of North Carolina Greensboro US This Companion is called economics and philosophy but actually it is about the philosophy of economics and all the great questions in the subject are here The weather in the philosophy of economics has been stormy lately and the climate continues to this day to be unsettled Will the storms soon settle down to give way to calmer days Read this excellent collection of informative papers in the field to stimulate your own answer to that question Mark Blaug University of London and University of Buckingham UK The Elgar Companion to Economics and Philosophy aims to demonstrate exactly how these two important areas have always been linked and to illustrate the key areas of overlap The Companion is divided into distinct parts each of which highlights a leading area of scholarly concern political economy conceived as social philosophy the methodology and epistemology of economics and social ontology and the ontology of economics The contributors are well known and distinguished authors from a variety of disciplines who have been invited both to survey and to provide a personal assessment of current and prospective future states of their respective areas of philosophical interest Academics and students who have an interest in economics and philosophy political philosophy and the history of ideas will find this book of great appeal as will researchers working in the field and readers interested in the nature of the discipline of economics
