The Making Of Modern London 1914 1939:

The making of modern London [braille] gavin weightman,1986 **The Making of Modern London** Gavin Weightman,Joanna Mack,John Taylor,2007 On their original publication the four volumes of THE MAKING OF MODERN LONDON were hailed as innovative and riveting histories of the city combining living memory with diligent historical research Accompanying a popular television series of the same name THE MAKING OF MODERN LONDON was a ground breaking publication and drew upon the extensive knowledge and expertise of leading academics of the day Now skilfully woven into one volume this new publication picks up the story in 1815 when London was the gas lit horse drawn city of Charles Dickens day In the two centuries that followed London has become one of the greatest cities in the world with a history that is endlessly fascinating and enduring especially when it is related in the words of the people who lived and breathed the city from the lightermen on the 19th century River Thames and the debutantes who jitterbugged their way around the dancefloors of the 1930s to the East Enders whose poignant memories of the air raids and bombings of the Second World War stir our emotions even today And this is one of the few histories of the capital that records the excitement of the Coronation in 1953 the Swinging London of the 1960s and the revolution in dress and habits from the 1970s onwards Written with verve sympathy and elan this is the intimate story of London as never told before The Making of Modern English Society from 1850 Janet Roebuck,2005-08-04 In the second half of the nineteenth century and the first half of the twentieth century a variety of forces emerged which changed society in many profound and subtle ways The Making of Modern English Society from 1850 uses the findings of recent historical and sociological research contemporary literature and a wide range of historical sources to form a clear picture of the main patterns of the social changes which took place in this turbulent period Jane Roebuck shows how in these hundred years the whole fabric of society altered more rapidly and radically than in ant preceding century She gives and account of the dramatic change which occurred in all spheres of national liked She demonstrates how the drift towards socialism which began in the nineteenth century gathered momentum in the twentieth and how massive social chance was on produce of the two world wars In the field of economics the author considers the development of the maturing but still primitive industrial economy of the mid nineteenth century into a modern economy based on mass production and mass consumption She also describes the change in emphasis from desire for world power to concern for domestic prosperity and welfare services **The Making of the Modern British Home** Peter Scott,2013-08-29 The Making of the Modern British Home explores the impact of the modern suburban semi detached house on British family life during the 1920s and 1930s focusing primarily on working class households who moved from cramped inner urban accommodation to new suburban council or owner occupied housing estates Migration to suburbia is shown to have initiated a dramatic transformation in lifestyles from a traditional working class mode of living based around long established tightly knit urban communities to a recognisably modern mode centred around the home the nuclear family and

building a better future for the next generation This process had far reaching impacts on family life entailing a change in household priorities to meet the higher costs of suburban living which in turn impacted on many aspects of household behaviour including family size This volume also constitutes a general history of the development of both owner occupied and municipal suburban housing estates in interwar Britain including the evolution of housing policy the housing development process housing and estate design lay outs and architectural features marketing owner occupation and consumer durables to a mass market furnishing the new suburban home making ends meet suburban gardens social filtering and conflict on the new estates and problems of mis selling and Jerry building Peter Scott integrates the social history of the interwar suburbs with their economic business marketing and architectural planning histories demonstrating how these elements interacted to produce a new model of working class lifestyles and respectability which marked a fundamental break with pre 1914 working class urban communities *Working Class Cultures in Britain, 1890-1960* Prof Joanna Bourke, Joanna Bourke, 2008-01-28

Integrating a variety of historical approaches and methods Joanna Bourke looks at the construction of class within the intimate contexts of the body the home the marketplace the locality and the nation to assess how the subjective identity of the working class in Britain has been maintained through seventy years of radical social cultural and economic change She argues that class identity is essentially a social and cultural rather than an institutional or political phenomenon and therefore cannot be understood without constant reference to gender and ethnicity Each self contained chapter consists of an essay of historical analysis introducing students to the ways historians use evidence to understand change as well as useful chronologies statistics and tables suggested topics for discussion and selective further reading *The Making of Modern London* Weightman, Humph, 2008-06-01

In this magnificent introduction to the last 200 years of London s momentous history the authors skillfully combine living memory with diligent historical research to record the city of London from Dickens s time to the present day *The Subterranean Railway* Christian Wolmar, 2012-11-01 Since the Victorian era London s Underground has had played a vital role in the daily life of generations of Londoners Christian Wolmar celebrates the vision and determination of the 19th century pioneers who made the world s first and still the largest underground passenger railway one of the most impressive engineering achievements in history From the early days of steam to electrification via the Underground s contribution to 20th century industrial design and its role during two world wars the story comes right up to the present with its sleek driverless trains and the wrangles over the future of the system This book reveals London s hidden wonder in all its glory and shows how the railway beneath the streets helped create the city we know today

Routledge Revivals: Metropolis London (1989) David Feldman, Gareth Stedman Jones, 2016-10-04 First published in 1989 this book seeks to demonstrate the social and political images of late twentieth century London the post big bang city docklands trade union defeats a mounting north south divide do not mark as decisive break with the past as they may appear to It argues that the most striking thing about London s history since 1800 is the continuities and recurrences which

punctuate it The essays collected in this book focus on these themes and address important questions about class nationality sexual difference and radical politics They combine the established strengths of social history with more innovative approaches such as the history of representations The Cambridge Urban History of Britain Peter Clark,David Michael Palliser,Martin J. Daunton,2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century **The experience of suburban modernity** Michael John Law,2014-12-01 The experience of suburban modernity looks at the history of the London suburbs in the interwar years It shows that contrary to those accounts that portray suburbia as static and boring these suburbs were in fact at the heart of the adoption of private transport and new mobilities Wealthier middle class suburbanites enjoyed driving at speed on new arterial roads visiting roadhouses for a transgressive night out taking five shilling flights from the local airport and joining cycling and motorcycle clubs All this fun came at a price for some in the form of thousands of deaths in road accidents plane crashes on suburban housing and in the despoiling of the countryside through road development This book will be welcomed by academics and students working in suburban studies historical geography and interwar British history and can also be enjoyed by anyone interested in the history of London
