The Making of Silicon Valley Santa Clara Valley Historical Association, 1995 *The Making of Silicon Valley* Ward Winslow, 1995 **Silicon Valley Signals: Technological Enthusiasm & the Times** Nima Moinpour, 2020-04-12 How might we account for the effectiveness of Silicon Valley during our times Both as a place and as a cultural icon Silicon Valley has generated a mystique about its power to produce economic and cultural effects It speaks loudly in our civilization today and there is an aura of mystery about it How has Silicon Valley arrived at this point in its development Companies such as Apple Google Hewlett Packard and Intel compose part of the legend that Silicon Valley has become but the roots of that legend extend further in time and geography Others have approached the same questions and have noted its industrial roots but only reached so far back My contention is the modern economic and cultural phenomenon of Silicon Valley crystallized because of its local geomorphology and the ensuing technological enthusiasm contributed to its historical and material conditions for such techno mediatic unfolding This work will distinguish itself from others not just by connecting geography to technical developments but also by exploring the epistemological disposition that Silicon Valley claimed and spilled over into upcoming milieus of technological development and civilizational progress By addressing the research questions through methods and concepts derived from Media Archeology methodology a methodology originating in the field of Media Studies I argue that the manifold inter involvements of geomorphology and technical enthusiasm account for the force of Silicon Valley in media history and the book takes you through various intersections of concrete pillars to build you a sound frame of mind about this mysterious region and culture *Green Business* □ *the Billion Dollar Deal: The Dot-coms Make an Exit* □ *Showtime for the Dot-greens* Dietrich Walther, 2012-05-01 The investment strategies and entrepreneurial heart of the dot com bubble should be used as a rough guideline for the development of a sustainable dot green boom This book outlines the methods necessary for that development and hints at needed institutional and educational changes to reach that goal

Pathways to High-Tech Valleys and Research Triangles Willem Hulsink, J. J. M. Dons, 2008-05-23 About the book The contents of most of the chapters included in this volume were originally presented and discussed during the academic workshop High tech Valleys and Research Triangles in the East of the Netherlands and elsewhere held on 30 November and 1 December 2005 at the Wageningen International Congress Centre WICC in the Netherlands At that time we had an informal agreement with Rob Bogers series editor of the Wageningen UR Frontis book series that if the quality and quantity of the talks and papers at the seminar would be sufficient and if there was willingness among the potential authors an edited book volume based upon the results of the workshop would be a possibility After the workshop when we had a critical mass of ten chapters and a dedicated group of committed authors the book project was given the green light As editors we realized that there were still a couple of topics and themes missing and when we had found colleagues for these four additional chapters that needed to be written our Frontis book was on the roll Although most of the time it was great fun the whole process of writing reviewing rewriting editing and proofreading took a lot of time much more time than we originally had foreseen We would like to thank all authors of the fourteen chapters of this book for their excellent contributions
