Hamish Fraser,1999-06-21 This new history of British trade unionism offers the most concise and up to date account of 300 years of trade union development from the earliest documented attempts at collective action by working people in the eighteenth century through to the very different world of New Unionism and New Labour Education in Britain, 1750-1914 W B Stephens,1999-01-18 This concise study covers the development of education throughout Great Britain from the Industrial Revolution to the Great War a period in which urbanization industrialization and population growth posed huge social and political problems and education became one of the fiercest areas of conflict in

Competitive Advantage on the Shop Floor William Lazonick, 1990 William Lazonick explores how technological change has interacted with the organization of work with major consequences for national competitiveness and industrial leadership Looking at Britain the United States and Japan from the nineteenth century to the present he explains changes in their status as industrial superpowers Lazonick stresses the importance for industrial leadership of cooperative relations between employers and shop floor workers Such relations permit employers to use new technologies to their maximum potential which in turn transforms the high fixed costs inherent in these technologies into low unit costs and large market shares Cooperative relations can also lead employers to invest in the skills of workers themselves skills that enable shop floor workers to influence quality as well as quantity of production To build cooperative shop floor relations successful employers have been willing to pay workers higher wages than they could have secured elsewhere in the economy They have also been

willing to offer workers long term employment security These policies Lazonick argues have not come at the expense of profits but rather have been a precondition for making profits Focusing particularly on the role of labor management relations in fostering flexible mass production in Japan since the 1950s Lazonick criticizes those economists and politicians who in the face of the Japanese challenge would rely on free markets alone to restore the international competitiveness of industry in Britain and the United States *Social Classes in Marxist Theory* Allin Cottrell,2019-11-19 First published in 1984 This study critically examines the conceptions of social class employed by Marx and by modern Marxist writers to probe their problematic areas and to propose certain modifications to those conception The author also tests the conclusions deriving from this theoretical reflection against the task of analysing some aspects of the development of class relations in a particular social formation in Britain This title will be of interest to students of philosophy and politics *Building the New World* Erik Olssen,2013-10-01 These essays are the result of a study of the Dunedin working class suburb of Caversham Olssen discusses a number of important theoretical issues the writing of history the question of class the role of gender the nature of work and the growth of the labor movement are all explored *The Cambridge Economic History of Modern Britain* Roderick Floud,Jane Humphries,Paul Johnson,2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 1 tracks Britain s economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods New approaches are proposed to classic issues such as the causes and consequences of industrialisation the role of institutions and the state and the transition from an organic to an inorganic economy as well as introducing new issues such as globalisation convergence and divergence the role of science technology and invention and the growth of consumerism Throughout the volume British experience is set within an international context and its performance benchmarked against its global competitors **Narrative and Genre** Mary Chamberlain,Paul Thompson,2002-11 Narrative and Genre presents exciting new debates in an emerging field where international academics from a plethora of disciplines examine the conventions and restrictions of language and genre and how they influence our communication *Manful Assertions* Michael Roper,John Tosh,2021-10-14 Masculine assertions whether of verbal command political power or physical violence have formed the traditional subject matter of history This volume combines current discussions in sexual politics with historical analysis to demonstrate that far from being natural and monolithic masculinity is an historical and cultural construct with varied competing and above all changing forms **The Labour Aristocracy Revisited** Takao Matsumura,1983 **The Texture of Industry** Robert B. Gordon,Patrick M. Malone,1997-02-06 While historians have given ample attention to stories of entrepreneurship invention and labor conflict they have told us little about actual work places and how people worked Workers seldom wrote about their daily employment

However they did leave behind their tools products shops and factories as well as the surrounding industrial landscapes and communities In this book Gordon and Malone look at the industrialization of North America from the perspective of the industrial archaeologist Using material evidence from such varied sites as Indian steatite quarries automobile plants and coal mines they examine manufacturing technology transportation systems and the effects of industrialization on the land Their research greatly expands our understanding of industry and focuses attention on the contributions of anonymous artisans whose skills shaped our industrial heritage
