An Introduction to Second Language Acquisition Research Diane Larsen-Freeman, Michael H. Long, 2014-09-25

Understanding how people learn and fail to learn second and foreign languages is increasingly recognised as a critical social and psycholinguistic issue. Second languages are vitally important to diverse groups of people ranging from refugees to college students facing foreign language requirements. This book provides a synthesis of empirical findings on second and foreign language learning by children and adults, emphasising the design and execution of appropriate research. **SLA Research and Materials Development for Language Learning** Brian Tomlinson, 2016-05-20. SLA Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections: position statements, materials driven by SLA theory, evaluations of materials in relation to SLA theory, and proposals for action that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for postgraduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

Fifty-seven chapters are organized in eight thematic sections: social contexts of second language learning; research methodologies in second language learning; acquisition and teaching; contributions of applied linguistics to the teaching and learning of second language skills; second language processes and development; teaching methods and curricula; issues in second or foreign language testing and assessment; identity, culture, and critical pedagogy in second language teaching and learning; and important considerations in language planning and policies. This textbook offers an introductory

overview of eight hotly debated topics in second language acquisition research. It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research. Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study. The reader is asked to consider the issues based on their own experiences thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology. The topics are treated independently so that they can be read in any order that interests the reader.

Second Language Acquisition in Action Andrea Nava, Luciana Pedrazzini, 2018-03-22 Despite the key role played by second language acquisition SLA courses in linguistics teacher education and language teaching degrees participants often struggle to bridge the gap between SLA theories and their many applications in the classroom. In order to overcome the transfer problem from theory to practice Andrea Nava and Luciana Pedrazzini present SLA principles through the actions and words of teachers and learners. *Second Language Acquisition in Action* identifies eight important SLA principles and involves readers in an experiential approach which enables them to explore these principles in action. Each chapter is structured around three stages: experience and reflection, conceptualisation and restructuring, and planning. Discussion questions and tasks represent the core of the book. These help readers in the process of experiencing SLA research and provide them with opportunities to try their hands at different areas of language teachers' professional expertise. Aimed at those on applied linguistics MA courses, TESOL, EFL trainees and in-service teachers, *Second Language Acquisition in Action* features Key Questions at the start of each chapter, Data-based tasks to foster reflection and to help bridge the gap between theory and practice, Audiovisual extracts of lessons on an accompanying website, Further Reading suggestions at the end of each chapter.

Teacher Research in Language Teaching Simon Borg, 2013-03-28 Based on original research, this book explores the fundamental relationship between research and practice in English language teaching. *Teacher Research in Language Teaching* uses empirical evidence taken from an international survey of over 1 700 teachers and educational managers over a period of six years. It examines their views of research, whether they read ELT research and whether they do their own research. The author goes on to explore the process which teachers go through in learning to do research and the research cultures within teaching institutions. The book concludes with a review of the key findings to emerge from the research and a discussion of strategies through which language teacher research engagement can be promoted more productively.

Interfaces Between Second Language Acquisition and Language Testing Research Lyle F. Bachman, Andrew D. Cohen, 1998 Second language acquisition (SLA) and language testing (LT) research have largely been viewed as distinct areas of inquiry in applied linguistics. This book provides a fresh look at areas of common interest to both SLA and LT research and ways in which research in these two areas of applied linguistics can be fruitfully integrated.

Contemporary Approaches to Second Language Acquisition María del Pilar García

Mayo, María Junkal Gutierrez Mangado, María Martínez Adrián, 2013-02-19 Second language acquisition SLA is a field of inquiry that has increased in importance since the 1960s. Currently researchers adopt multiple perspectives in the analysis of learner language, all of them providing different but complementary answers to the understanding of oral and written data produced by young and older learners in different settings. The main goal of this volume is to provide the reader with updated reviews of the major contemporary approaches to SLA, the research carried out within them, and wherever appropriate, the implications and/or applications for theory, research, and pedagogy that might derive from the available empirical evidence. The book is intended for SLA researchers as well as for graduate MA/PhD students in SLA research, applied linguistics, and linguistics, as the different chapters will be a guide in their research within the approaches presented. The volume will also be of interest to professionals from other fields interested in the SLA process and the different explanations that have been put forward to account for it.
