Comparative Context Cameron Sutt, 2015-07-28 In *Slavery in the Early Middle Ages: Hungary in a Comparative Context* Cameron Sutt examines servile labour in the first three centuries of the Hungarian kingdom and compares it with dependent labour in Carolingian Europe. Such comparative methodology provides a particularly clear view of the nature of dependent labour in both regions. Using legislation as well as charter evidence Sutt establishes that lay landlords of early medieval Hungary frequently relied upon slaves to work their land but the situation in Carolingian areas was much more complex. The use of slave labour in Hungary continued until the end of the thirteenth century when a combination of economic and political factors brought it to an end.

The Cambridge History of Scandinavia Knut Helle, 2003-09-04 This volume presents a comprehensive exposition of both the prehistory and medieval history of the whole of Scandinavia. The first part of the volume surveys the prehistoric and historic Scandinavian landscape and its natural resources and tells how man took possession of this landscape adapting culturally to changing natural conditions and developing various types of community throughout the Stone, Bronze and Iron Ages. The rest and most substantial part of the volume deals with the history of Scandinavia from the Viking Age to the end of the Scandinavian Middle Ages c. 1520. The external Viking expansion opened Scandinavia to European influence to a hitherto unknown degree. A Christian church organisation was established, the first towns came into being and the unification of the three medieval kingdoms of Scandinavia began coinciding with the formation of the unique Icelandic Free State.

All the King's Women: Polygyny and Politics in Europe, 900-1250 Jan Rüdiger, 2020-09-25 Polygyny in Europe. The grand narrative of Western history is the development of monogamous marriage culminating in the central Middle Ages. Other kinds of relationships have often perhaps too lightly been dismissed as just lust. In this book Jan Rüdiger investigates the plurality of man-woman relationships in medieval Scandinavia and analyses the social and political uses of elite polygyny. By way of comparison the findings from the North are then applied to England, France and the Iberian Peninsula in order to propose a new overall image of elite polygyny including marriage in the medieval West. A detailed local study is combined with a consideration of wider issues concerning Anglo-Saxon England and long and short term changes unrelated to successive conquests.
