work from the basis that animals are an integral part of society and that past society is the object of most archaeological inquiry Discussion papers explore this topic and use the case studies presented in other contributions to suggest the importance of ethnozoarchaeology not just to archaeology but also to anthrozoology A further contribution to archaeological theory is made by an argument for the validity of ethnozoarchaeology derived models to Neanderthals The book makes a compelling case for the importance of human animal relations in the archaeological record and demonstrates why the information contained in this record is of significance to specialists in other disciplines
