Raffan, Bert Horwood, 1998-06-30 A symbol unique to Canada the canoe is one of the greatest gifts of First Peoples to all those who came after The Science of Science Dashun Wang, Albert-László Barabási, 2021-03-25 This is the first comprehensive overview of the exciting field of the science of science With anecdotes and detailed easy to follow explanations of the research this book is accessible to all scientists policy makers and administrators with an interest in the wider scientific enterprise Cruise of the Minnie Maud Alfred Tremblay, 1921 Contains a description of Capitan J E Bernier's expedition to Baffin Island and of expedition member Alfred Tremblay's explorations of Hudson Bay Eclipse Sound Admiralty Inlet and other arctic regions in the Arctic Archipelago *The North Pole: Its Discovery in 1909 Under the Auspices of the Peary Arctic Club* Robert Edwin Peary, 1986-01-01 It may not be inapt to liken the attainment of the North Pole to the winning of a game of chess in which all the various moves leading to a favorable conclusion had been planned in advance long before the actual game began It was an old game for me a game which I had been playing for twenty three years with varying fortunes Always it is true I had been beaten but with every defeat came fresh knowledge of the game its intricacies its difficulties its subtleties and with every fresh attempt success came a trifle nearer what had before appeared either impossible or at the best extremely dubious began to take on an aspect of possibility and at last even of probability Every defeat was analyzed as to its causes in all their bearings until it became possible to believe that those causes could in future be guarded against and that with a fair amount of good fortune the losing game of nearly a quarter of a century could be turned into one final complete success It is true that with this conclusion many well informed and intelligent persons saw fit to differ But many others shared my views and gave without stint their sympathy and their help and now in the end one of my greatest unalloyed pleasures is to know that their confidence subjected as it was to many trials was not misplaced that their trust their belief in me and in the mission to which the best years of my life have been given have been abundantly justified But while it is true that so far as plan and method are concerned the discovery of the North Pole may fairly be likened to a game of chess there is of course this obvious difference in chess brains are matched against brains In the quest of the Pole it was a struggle of human brains and persistence against the blind brute forces of the elements of primeval matter acting often under laws and impulses almost unknown or but little understood by us and thus many times seemingly capricious freaky not to be foretold with any degree of certainty For this reason while it was possible to plan before the hour of sailing from New York the principal moves of the attack upon the frozen North it was not possible to anticipate all of the moves of the adversary Had this been possible my expedition of 1905 1906 which established the then farthest north record of 87° 6' would have reached the Pole But everybody familiar with the records of that expedition knows that its complete success was frustrated by one of those unforeseen moves of our great adversary in that a season of unusually violent and continued winds disrupted the polar pack separating me from my supporting parties with insufficient supplies so that when almost within striking distance of the goal it was necessary to turn back because of the imminent peril of starvation When

victory seemed at last almost within reach I was blocked by a move which could not possibly have been foreseen and which when I encountered it I was helpless to meet And as is well known I and those with me were not only checkmated but very nearly lost our lives as well But all that is now as a tale that is told This time it is a different and perhaps a more inspiring story though the records of gallant defeat are not without their inspiration And the point which it seems fit to make in the beginning is that success crowned the efforts of years because strength came from repeated defeats wisdom from earlier error experience from inexperience and determination from them all
