Small Format Television:

Television Across Asia Michael Keane, Albert Moran, 2003-10-16 This book explores the trade in television program formats which is a crucially important ingredient in the globalisation of culture in Asia. It examines how much traffic there is in program formats, the principal direction of flow of such traffic and the economic and cultural significance of this trade for the territories involved and for the region as a whole. It shows how new technology, deregulation, privatisation and economic recession have greatly intensified competition between broadcasters in Asia as in other parts of the world and discusses how this in turn has multiplied the incidence of television format remakes, with some countries developing dedicated format companies and others becoming net importers and adapters of formats.

Global Television Formats Sharon Shahaf, Tasha Oren, 2013-06-17 *Global Television Formats* aims to revise the place of the global in television studies. The essays gathered here explore the diversity of global programming and approaches and ask how to theorize contemporary global formats and thus re-shape our understanding of television as at once a shared global and specific local text, an economic system, a socio-political institution and a popular practice. The contributors explore a wide array of television programming from the Middle East, Western and Eastern Europe, South Asia, North America, Latin America and Brazil and represent a broad range of perspectives.

Micro Media Industries Lori Kido Lopez, 2021-08-13 *Micro Media Industries* explores the media of Hmong Americans, showing how an extremely small population can maintain a robust and thriving media ecology in spite of resource limitations and an inability to scale up. It argues that micro media industries provide models of media innovation that can counter the increasing power of mainstream media.

Television Jeremy G. Butler, 2012-02-20 For nearly two decades *Television: Critical Methods and Applications* has served as the foremost guide to television studies. Designed for the television studies course in communication and media studies curricula, *Television* explains in depth how television programs and commercials are made and how they function as producers of meaning. Author Jeremy G. Butler shows the ways in which camera, style, lighting, set design, editing and sound combine to produce meanings that viewers take away from their television experience. He supplies students with a whole toolbox of implements to disassemble television and read between the lines, teaching them to incorporate critical thinking into their own television viewing. The fourth edition builds upon the pedagogy of previous editions to best accommodate current modes of understanding and teaching television. Highlights of the fourth edition include a new chapter and part organization to reflect the current approach to teaching television with greatly expanded methods and theories chapters. An entirely new chapter on modes of production and their impact on what you see on the screen. Discussions integrated throughout on the latest developments in television, such as convergence with other media such as material on transmedia storytelling and YouTube's impact on video distribution. Over three hundred printed illustrations including new and better quality frame grabs of recent television shows and commercials. A companion website featuring color frame grabs, a glossary, flash cards and editing and sound exercises for students as well as PowerPoint.

Audiences Ian Christie, 2012 This timely volume engages with one of the most important shifts in recent film studies the turn away from text based analysis towards the viewer Historically this marks a return to early interest in the effect of film on the audience by psychoanalysts and psychologists which was overtaken by concern with the effects of film linked to calls for censorship and moral panics rather than to understanding the mental and behavioral world of the spectator Early cinema history has revealed the diversity of film viewing habits while traditional box office studies which treated the audience initially as a homogeneous market have been replaced by the study of individual consumers and their motivations Latterly there has been a marked turn towards more sophisticated economic and sociological analysis of attendance data And as the film experience fragments across multiple formats the perceptual and cognitive experience of the individual viewer who is also an auditor has become increasingly accessible With contributions from Gregory Waller John Sedgwick and Martin Barker this work spans the spectrum of contemporary audience studies revealing work being done on local non theatrical and live digital transmission audiences and on the relative attraction of large scale domestic and mobile platforms Publisher's website

The Format Age Jean K. Chalaby,2015-12-22 Few trends have had as much impact on television as formats have in recent years Long confined to the fringes of the TV industry they have risen to prominence since the late 1990s Today they are a global business with hundreds of programmes adapted across the world at any one time from mundane game shows to blockbuster talent competitions from factual entertainment to high end drama Based on exclusive industry access this book provides an in depth analysis of the complex world of the TV format from its origins to the present day Chalaby delivers a comprehensive account of the TV format trading system and conceptualizes the global value chain that underpins it unpicking the corporate strategies and power relations within Using interviews with format creators he uncovers the secrets behind the world's most travelled formats exploring their narrative structure and cultural meanings

Understanding the Global TV Format Albert Moran,Justin Malbon,2006-01-01 Recent years have seen an astonishing growth in the adaptation of program formats in television systems across the world Under the new market conditions of the multi channel cluster brought about by new technologies and increased privatization of service the adaptation of successful and popular TV formats from one place to another is occurring on an increasingly regular basis Hence the remaking of different national versions of Big Brother and Pop Idol are only part of what is going on In fact from Chinese versions of Coronation Street and Sex and the City Indian and Indonesian remakes of Who Wants To Be A Millionaire program clones of Ground Force and

other make over and renovation shows across Europe and the UK the present is the era of the global TV format But what exactly is a format After all programs have been copied and imitated since the beginnings of broadcasting In this the first book in the English language to systematically deal with the subject Albert Moran and Justin Malbon provide a valuable guide to the institutional cultural and legal dimensions of the format Now widely referred to although equally often misunderstood the TV format is a commodity of production finance distribution broadcasting and marketing knowledges that is facilitating the international reconfiguration of program making Understanding the Global TV Format thus addresses the different stages and issues of the business It tracks the steps whereby formats are devised developed and distributed Major companies are profiled as are the international markets and festivals at which trade occurs However there is also a great deal of piracy taking place so that the book is concerned with the control and regulation of format remaking Legal protection is often both the first and last recourse of parties and the authors examine the relevance of laws relating to such matters as copyright and contract
