Sniffing and Smelling Henry Pluckrose,1997 Youngsters learn about the many odors and their origins in the environment They examine the importance of their sense of smell in detecting a great variety of aromas and the differences among them Children discover that animals too have a sense of smell sometimes keener than their own Taste and Smell Thomas Hummel,Antje Welge-Lüssen,2006-01-01 Chemosensory dysfunction is a quite frequently occurring problem which significantly affects the patient s quality of life It can result from infectious agents environmental factors toxins traumatic brain injuries as well as neurodegenerative diseases This publication provides up to date articles on the chemical senses including the olfactory trigeminal and gustatory systems The vomeronasal system and its potential significance in humans is also discussed Based on recent functional imaging data the book provides an overview on how the lower senses function how they work together for example to produce flavor how they can be damaged and repaired and how the function of human chemical senses can be assessed The publication focuses on chemosensory dysfunction and pays particular attention to taste and its disorders Renowned experts in their fields of research have contributed their findings to this topical update on chemosensory disorders and made this volume indispensable reading for otorhinolaryngologists and neurologists

Dopamine and Olfaction Astrid Reiter,2005 The Witch and the Priest of Lies John Baldwin Large,2022-02-23 The Witch and the Priest of Lies By John Baldwin Large In a quiet old New England town a Native American holy site becomes the home for a satanic ritual But when things go horribly wrong worshippers are butchered and an inexplicable horror is unleashed on the town High school psychologist Julie Bernard witnesses the whole event in her dreams Unsure of what she saw and even more confused as to why she witnessed it Julie is thrown into an ancient struggle between good and evil As she works to uncover the truth about the night s events she uncovers more secrets about the town and her own life than she could have possibly imagined Sniffing and Smelling : Subsystems of Human Olfaction Noam Sobel,1999 What's That Smell? Simon Hajdini,2024-03-05 How our sense of smell engages with philosophy psychoanalysis and political economy and how it can help enrich our understanding of the nature of truth language economy and sexuality Why is it that in Indo European languages at least we have no language to describe smells leaving us and famously Juliet no choice but to call the scent of a rose simply sweet In What s That Smell a groundbreaking exploration of the intersection between philosophy psychoanalysis and the oft neglected sense of smell Simon Hajdini sets out to answer this complex question Through new readings of traditional and modern philosophical texts Hajdini places smell at the very center of a philosophical critique of the traditional notion of truth challenging the idea that smell is the antiphilosophical sense par excellence Through fresh engagements with fundamental philosophical issues original analyses of modern literature and film and the novel use of scientific research into smell within a humanities context Hajdini situates problems of olfaction at the very point of inception of cultural life He proposes that ontology civilization and capitalist economy alike can be said to amount to shit management

And only by following the philosophically most deplorable of the senses the book argues can we better understand the central philosophical psychoanalytical and political issues of truth sex and exploitation

**Odor Sensation and Memory** Trygg Engen, 1991-11-21 Our sense of smell as Trygg Engen reminds us early in this definitive work has been neglected as a research area This neglect belies the very critical role that the sense plays in human adaptation to the environment through the monitoring of odors Smell is learned through experience and results Engen maintains in a schema of memory system that enables individuals to process and categorize odors There are closer relationships between the

individual detecting an odor the circumstances or environment and the reaction of pleasure or aversion than with the other senses When future occasions present the same or similar odors memory will bring back the early experience and directly affect the reaction to the new stimuli Engen sees odor perception as mainly psychological unlike the traditional approach which sees the sense largely as an innate mechanism with a direct physiological basis The research underlying this book is the most current in sensory cognition reminding the reader of the importance of the sense of smell through examples of what deprivation entails The author develops an appreciation of the odor sensing ability mankind has and explores the uses to which that sense is applied The ability to relate past to present perception odor memory and the gradations of odor impact are discussed as well as the engaging questions of fragrances effects on behavior odors and sexuality mother infant bonding and pollution This book is essential reading for all who work in areas relating to sensory perception and cognition

*Stinking Philosophy!* Benjamin Young, 2024-08-06 The nature of olfaction its importance for understanding perennial issues of philosophy of mind perception and consciousness and its implications for cognitive neuroscience What are smells Despite the best efforts of philosophy and the chemosciences the question remains vexing but no more perplexing than the historical lapse of the past centuries to seriously consider a sense that has a key place in philosophy of mind and perception *Stinking Philosophy* is Benjamin Young's answer to this critical lapse Drawing together more than a decade's research on olfactory philosophy the book offers a clear comprehensive look at the nature of odors how we perceive smells how we cognitively represent odors how we communicate about them as categories and what they can tell us about consciousness In *Stinking Philosophy* Young presents a methodology for addressing the philosophical and conceptual issues raised by the sense of smell Then in an exacting and coherent fashion he explores how the philosophy of smell contributes to and advances a wide range of debates within philosophy of mind perception and cognitive neuroscience Ultimately his work demonstrates how empirically informed philosophy can have a significant impact on interdisciplinary research on smell across philosophy the chemosciences and neuroscience

**Foclóir Gaeilge agus Béarla** Patrick Stephen Dinneen,1927 **The Smell of Slavery** Andrew Kettler,2020-05-28 In the Atlantic World different groups were aromatically classified in opposition to other ethnic gendered and class assemblies due to an economic necessity that needed certain bodies to be defined as excremental which culminated in the creation of a progressive tautology that linked Africa and waste through a conceptual hendiadys born of capitalist licentiousness The African subject was defined as a scented object appropriated as filthy to create levels of ownership through discourse that marked African peoples as unable to access spaces of Western modernity Embodied cultural knowledge was potent enough to alter the biological function of the five senses to create a European olfactory consciousness made to sense the African other as foul Fascinating informative and deeply researched The Smell of Slavery exposes that concerns with pungency within the Western self were emitted outward upon the freshly dug outhouse of the mass slave grave called the Atlantic World

reporter Mari Kinsella begin to find connections among the victims begin to find others haunted by the same strange nightmares that drove the five to their deaths begin themselves to fall into a deadly danger that should only exist in dreams previously published as written by Shane Christopher     *The Behavioral Biology and Conservation of Goitered Gazelles (Gazella subgutturosa)* David Blank,2025-03-27 This comprehensive and lavishly illustrated book summarizes all known information on the Goitered Gazelle *Gazella subgutturosa* one of the world s most endangered antelopes It includes information on topics such as feeding ecology behavior vocalizations parasites and diseases and conservation This research monograph will be of interest to professional researchers of ungulates university staff students and naturalists     **Learning to Smell** Donald A. Wilson,Richard J. Stevenson,2006-06-06 Written by a neurobiologist and a psychologist this volume presents a new theory of olfactory perception Drawing on research in neuroscience physiology and ethology Donald A Wilson and Richard J Stevenson address the fundamental question of how we navigate through a world of chemical encounters and provide a compelling alternative to the reception centric view of olfaction The major research challenge in olfaction is determining how the brain discriminates one smell from another Here the authors hold that olfaction is generally not a simple physiochemical process but rather a plastic process that is strongly tied to memory They find the traditional approach which involves identifying how particular features of a chemical stimulus are represented in the olfactory system to be at odds with historical data and with a growing body of neurobiological and psychological evidence that places primary emphasis on synthetic processing and experiential factors Wilson and Stevenson propose that experience and cortical plasticity not only are important for traditional associative olfactory memory but also play a critical defining role in odor perception and that current views are insufficient to account for current and past data The book includes a broad comparative overview of the structure and function of olfactory systems an exploration into the mechanisms of odor detection and olfactory perception and a discussion of the implications of the authors theory Learning to Smell will serve as an important reference for workers within the field of chemical senses and those interested in sensory processing and perception
