Social And Economic Management In The Competitive Society:

Social and Economic Management in the Competitive Society Edgar Krau, 1997-12-31 In many countries of the world there is a growing feeling of uneasiness about the economic situation and its related social consequences Every day the newspapers tell us that the recession is over but we see only that scores of organizations go bankrupt while others are struggling hard to stay in business that many people have lost their jobs but welfare measures are being reduced or abolished altogether By now we should have become aware that our society is not facing temporary market difficulties but a much deeper and wider crisis with only one root in worldwide economic developments while other roots are social and psychological in nature These factors are intertwined and therefore the answer to the crisis cannot merely be an economic cost benefit analysis of organizational management Sociocultural factors participate in the economic process even at the level of individual organizations and what happens in them has backlash influences on the entire society Therefore the problem is not the management of the individual organization but the macroconception of management which in the Western world of today separates the economic aspects from the social ones and the individual organizations from society Social and Economic Management in the Competitive Society begins by analyzing the management models of today to determine which characteristics yield the best results on the economic and social levels The second step is to indicate the necessary changes of managerial thinking and acting in order to boost economic results with reasonable profits while minimizing social costs Finally the potential ramifications of such changes are explored

Roberts,2022-12-09 First published in 1985 Industrial Relations in Europe examines the development of trade unions and their relations with the employers and employers organisations in a number of Western European countries in the 1980s The shared characteristics of these systems are common heritage of political democracy market economies the right of employers to manage the business for which they are responsible and the right of employees to belong to unions which are free to bargain and to seek political goals which will advance the interests of their members With case studies from Denmark Germany France Great Britain Norway etc the volume showcases the major structural changes brought about by technological economic and social factors which had significant implications for trade unions and traditional patterns of industrial relations A major response was the erosion of centralized processes of decision making and a return to the individual local initiative and an increased interest in entrepreneurship This book is a must read for scholars of political economy industrial economy and economics in general The Last Half-Century Morris Janowitz,1978 The Last Half Century represents the culmination of a lifetime of scholarship by Morris Janowitz In this comprehensive and systematic analysis of the major trends in American society during the past fifty years he probes the weakening of popular party affiliations and the increased inability of elected representatives to rule Centering his work on the crucial concept of social control Janowitz orders and assesses a vast amount of empirical research to clarify the failure of basic social institutions to resolve our chronic conflicts For Janowitz social control denotes a society s capacity to regulate itself within a moral framework that transcends simple self interest He poses urgent questions Why has social control been so drastically weakened in our advanced industrial society And what strategies can we use to strengthen it again The explanation rests in part on the changes in social structure which make it more and more complicated for citizens to calculate their political self interest At the same time complex economic and defense problems also strain an already overburdened legislative system making effective responsive political rule increasingly difficult Janowitz concludes by assessing the response of the social sciences to the pressing problem of social control and asserts that new forms of citizen participation in the government must be found *The Dynamic Society* Graeme Snooks,2002-09-11 This book discusses the nature and process of change in human society over the past two million years The author draws on economic historical and biological concepts to examine the driving forces of change and looks to likely developments in the future This analysis produces some very thought provoking and controversial conclusions

Competition Stefan Arora-Jonsson,Nils Brunsson,Raimund Hasse,Katarina Lagerström,2021 The spread of competition

into all areas of society is one of the master trends of modern society Yet social scientists have played a surprisingly modest role in the analysis of its implications as the discussion of competition has largely been confined to the narrow context of economic markets This book opens up competition for the study of social scientists The central message of the book is that competition seems ubiquitous but it should not be taken for granted or be naturalized as an inevitable aspect of human existence Its emergence maintenance and change are based on institutions and organizational efforts and a central challenge for social science is to learn more about these processes and their outcomes With the use of a novel definition of competition more fundamental questions can be addressed than merely whether or not competition works How is competition constructed and by whom Which institutional and organizational foundations need to be considered Which behaviours result from competition What are its consequences Can competition be removed And how do these factors vary with the object of competition be it money attention status or other scarce and desired objects The chapters in the book investigate these and more questions in studies of competition among and within schools universities multinational corporations auditors waste disposal firms and fashion designers and users The chapters are written by scholars from several social science fields management organization studies sociology anthropology and education Publisher s website

Handbook of Biopolitics Sergei Prozorov, Simona Rentea, 2016-08-05 The problematic of biopolitics has become increasingly important in the social sciences Inaugurated by Michel Foucault's genealogical research on the governance of sexuality crime and mental illness in modern Europe the research on biopolitics has developed into a broader interdisciplinary orientation addressing the rationalities of power over living beings in diverse spatial and temporal contexts The development of the research on biopolitics in recent years has been characterized by two tendencies the increasingly sophisticated theoretical engagement with the idea of power over and the government of life that both elaborated and challenged the Foucauldian canon e.g. the work of Giorgio Agamben Antonio Negri Roberto Esposito and Paolo Virno and the detailed and empirically rich investigation of the concrete aspects of the government of life in contemporary societies Unfortunately the two tendencies have often developed in isolation from each other resulting in the presence of at least two debates on biopolitics the historico philosophical and the empirical one This Handbook brings these two debates together combining theoretical sophistication and empirical rigour The volume is divided into five sections While the first two deal with the history of the concept and contemporary theoretical debates on it the remaining three comprise the prime sites of contemporary interdisciplinary research on biopolitics economy security and technology Featuring previously unpublished articles by the leading scholars in the field this wide ranging and accessible companion will both serve as an introduction to the diverse research on biopolitics for undergraduate students and appeal to more advanced audiences interested in the current state of the art in biopolitics studies
