Korea's Retirement Predicament Thomas R. Klassen, Yunjeong Yang, 2013-07-31 The distinguishing feature for many workers in South Korea is contractual and often involuntary retirement at a young age mid 50s for most workers followed by precarious and low paying self employment or contract work In the past this practice which is also found in other East Asian nations provided firms with a youthful and highly productive workforce However with a rapidly aging population and shifts in the labour market the existing arrangement is becoming less and less functional This book examines how this retirement arrangement arose and the policy reforms that have been both undertaken and proposed to allow workers to remain employed longer The analysis focuses on the institutional constraints to reforms as well as the impact forced retirement has on individuals Using a multi disciplinary and comparative approach the authors study contractual mandatory retirement trends and policies in South Korea and in doing so illuminate the political social legal economic and labour market implications of this widespread practice As nations across Asia face aging populations this book will be welcomed by students and scholars interested in Korean studies social policy social welfare and gerontology It will also be of great value to policy makers

Globalization and Welfare Restructuring in China Huisheng Shou, 2016-10-14 In the past few decades the change in China's welfare system has been characterised by a balanced distribution of benefits across social sectors and the institutionalization of welfare redistribution This process has occurred without significant political change that would empower politically disadvantaged groups such as the urban and rural poor This book questions what has motivated the regime to redistribute welfare benefits through an institutionalized manner whilst its political structure remains largely unchanged By situating China within the broader context of East Asia and against the backdrop of globalization since the 1980s this book examines the institutional origin and development of China's new welfare system Through doing this it provides an understanding of the nature of the Chinese state in dealing with its economy and society in a context of global economic integration A global local dynamics framework highlights the importance of the interactive relationship between China's integration into the world economy and its unique geopolitical constraints which together induce the regime to listen to its subjects and follow a move to the middle in welfare restructuring Offering a novel explanation of the welfare globalization relations in a non democratic setting this book will be of interest to students and scholars of Social Policy International Political Economy and Chinese Politics

Understanding Korean Public Administration Kwang-Kook Park, Wonhee Lee, Seok-Hwan Lee, 2016-06-17 Although much has been written about the Korean public administration the international academic community has little knowledge about it as most of the literature has been written in Korean This book aims to provide more accessible knowledge internationally by filling that gap covering both the history and the current status of the Korean public administration This book is a collaboration of many Korean public administration scholars and would appeal to those interested in the secrets of Korea's rapid development in such a short span of time Each chapter covers historical contexts key to understanding its public administration and an important aspect as Korea is a fast changing

society The book takes on a more pragmatic approach rather than to put the Korean experiences into the western theory Each chapter therefore provides an extensive discussion on the lessons learned and practical implications Samsung, Media Empire and Family Chunhyo Kim, 2016-02-26 This book analyses media conglomerates owning multiple media holdings under centralized ownership within and across media markets It argues that Asian capitalists utilize both a market oriented ideology and family connections to build their media empires thereby creating cultural conglomerates that exercise corporate censorship over media markets It focuses on family controlled media conglomerates in Korea specifically the international business giant Samsung and its related media companies Cheil Jedang and JoongAng Ilbo all of which are controlled by the single Lee family Utilizing the theoretical approach of political economy of communication the book examines how and why the Lee family exercise corporate censorship over Korean society Offering an essential take on Asia's political economy of communication in order to understand the workings of Asian media empires this book will appeal to students and scholars of Korean Studies Korean Business and Mass Communications *The Governance of Financialization in Latin America and East Asia* Max Nagel, 2023-10-20 The Governance of Financialization in Latin America and East Asia analyses how states in these areas have adopted different monetary financial and foreign exchange policies to govern financialization which have induced varying levels of state control over financial markets The book analyzes the puzzling observation of policy divergence by investigating how countries have reacted differently to major financial crises since the 1970s It shows how Argentina and Japan selected a governance approach to financialization that followed Western prescriptions by propelling unregulated financialization but also how Chile and South Korea by contrast crafted policies to reduce the negative effects of financialization on economic development and financial stability The book identifies variegated expertise in central banks ministries of finance expert commissions and research institutions that has informed policymaking across Argentina Chile Japan and South Korea since the 1970s It then demonstrates how governments have used experts to achieve diverse political objectives and explains how governments can use experts to enhance state agency to counter globalization pressures This book will appeal to scholars of International Political Economy comparative politics economics sociology development studies and Latin American and East Asian history It will also be of interest to economists and policymakers who want to safeguard financial stability and promote economic growth The Korean State and Social Policy Stein Ringen, Huck-ju Kwon, Ilcheong Yi, Taekyoon Kim, Jooha Lee, 2011-05-27 There are two great mysteries in the political economy of South Korea How could a destroyed country in next to no time become a sophisticated and affluent economy And how could a ruthlessly authoritarian regime metamorphose with relative ease into a stable democratic polity South Korea was long ruled with harsh authoritarianism but strangely the authoritarian rulers made energetic use of social policy The Korean State and Social Policy observes South Korean public policy from 1945 to 2000 through the prism of social policy to examine how the rulers operated and worked After the military coup in 1961 the new leaders used social policy to buy themselves legitimacy That

enabled them to rule in two very different ways simultaneously In their determination to hold on to power they were without mercy but in the use of power in governance their strategy was to co opt and mobilize with a sophistication that is wholly exceptional among authoritarian rulers It is governance and not power that explains the Korean miracle Mobilization is a strategy with consequences South Korea was not only led to economic development but also inadvertently perhaps built up as a society rich in public and civil institutions When authoritarianism collapsed under the force of nationwide uprisings in 1987 the institutions of a reasonably pluralistic social and political order were there alive and well and democracy could take over without further serious drama This book is about many things development and modernization dictatorship and democracy state capacity and governance social protection and welfare states and Korean history But finally it is about lifting social policy analysis out of the ghetto of self sufficiency it is often confined to and into the center ground of hard political science

Korean Workers and Neoliberal Globalization Kevin Gray, 2013-03-07 One of the most remarkable aspects of South Korea's transition from impoverished post colonial nation to fully fledged industrialized democracy has been the growth of its independent and dynamic labour movement *Korean Workers and Neoliberal Globalisation* examines current trends and transformations within the Korean labour movement since the 1990s It has been a common assumption that the third wave of democratisation the end of the Cold War and the spread of neoliberal globalisation in the latter part of the 20th century have helped to create an environment in which organised labour is better placed to overcome bureaucratic national unionism and transform itself into a potential counter globalisation movement However Kevin Gray argues that despite the apparent continued phenomena of labour militancy and the rhetoric of anti neoliberalism the mainstream independent labour movement in Korea has become increasingly institutionalised and bureaucratised into the new capitalist democracy This process is demonstrated by the Korean Confederation of Trade Unions experience of participation in various forms of policy making forums Gray suggests that as a result the KCTU has failed to mount an effective challenge against processes of neoliberal restructuring and concomitant social polarisation The Korean experience provides an excellent case study for understanding the relationship between organised labour and globalisation *Korean Workers and Neoliberal Globalisation* will appeal to students and scholars of Korean studies and International Political Economy as well as Asian politics and economics
