Political Economy in the Evolution of China's Urban-Rural Economic Relations Fan Gao, 2021-12-29 This book investigates the trajectory and evolutionary mechanisms of China's urban rural economic relationships seeking to explore how a developing socialist country can attain sustainable development and common prosperity Grounded in a deep literature review and a practical analysis of real world conditions in China the study challenges the dual economy theory of development economics that has prevailed in discussion of Chinese urban rural

economic relationships and puts forward an alternative analytical framework based on political economy. Considering the role political and social factors have played in China's economic development since 1949, the author divides the evolution of China's urban-rural economic relationship into two stages. In the first stage, the relationship is seen to be a separated one, a situation that led to several repercussions, but the reform and opening up of the late 1970s marked a turning point leading to a second stage featured by imbalanced integration. Through empirical research, the book analyses the momentum, economic effects, and problems of this turn, thereby envisaging an upgraded stage marked out by collaborative integration, integral to further economic development and a more prosperous society in all respects. The title will appeal to scholars and students studying political economy, urban-rural economic relationships, development economics, and the Chinese economy. *Mega-City Region Development in China* Anthony G.O. Yeh, George C. S. Lin, Fiona F. Yang, 2020-11-22. This book sheds light on the mega-city region development in China as a new form of urbanization which plays a crucial role in the economic development of the country. It examines the challenges faced by the mega-city regions and opens up avenues for debates and further research. Economic reform of 1978 has led to an unprecedented growth in the population and economic development of China. A large portion of this increased urban population and the corresponding economic growth has been concentrated in the mega-city regions such as Beijing-Tianjin-Hebei, BTH, Yangtze River Delta YRD, and Pearl River Delta PRD. These three mega-city regions have less land but more people and thus higher economy, resulting in various issues and challenges faced by these regions. These challenges pertain to the socio-economic development, transport, environment, governance, and development strategy, which this book explores through case studies of Guangdong-Hong Kong-Macao Greater Bay Area, Beijing-Tianjin-Hebei, and Wuhan. This book also explains and analyses the economy migration processes, transport, development, environmental conditions, and governance of the mega-city regions of China. With an overview of China's rapid urbanisation and the consequent economic growth, this book provides an essential understanding of related issues in order to establish appropriate strategies and policies to sustain the process of mega-city region development. *Architecture Against the Post-Political* Nadir Lahiji, 2014-05-23. Written by a team of renowned contributors and carefully edited to address the themes laid out by the editors in their introduction, the book includes theoretical issues concerning the questions of aesthetics and politics and addresses city and urban strategies within the general critique of the post-political. By focusing on specific case studies from Warsaw, Barcelona, Dubai, Tokyo, and many more, the book consolidates the contributions of a diverse group of academics, architects, and critics from Europe, the Middle East, and America. This collection fills the gap in the existing literature on the relation between politics and aesthetics and its implications for the theoretical discourse of architecture today. In summary, this book provides a response to the predominant de-politicization in academic discourse and is an attempt to reclaim the abandoned critical project in architecture. **The Best Books for Academic Libraries: Social sciences**, 2002. Books recommended for undergraduate and college libraries listed by Library of Congress.
