The re-emergence of co-housing in Europe Lidewij Tummers,2017-10-02 Across Europe the number of co housing initiatives is growing and they are increasingly receiving attention from administrators and professionals who hold high expectations for urban liveability Is co housing a marginal idealist phenomenon or the urban middle class answer to the current housing crisis And has the development of theoretical insight and research kept up with the actual expansion of co housing as a practice These questions were raised during the first European conference on co housing research which took place in Tours France in March 2012 Both the conference and this book aim to move beyond case studies and to look more particularly at the implications and wider perspective of the current co housing trend Using the specific vocabulary of different disciplines and geographic regions the contributions to this book analyse the underlying thinking behind and the expectations projected on diverse models of collaborative housing The authors are aware of the qualities of contemporary co housing but they go beyond advocacy to investigate the conditions under which co housing can be successful as a strategy for housing provision can offer solutions for sustainable urban development or indeed can contribute to involuntary or

intentional gentrification This book was originally published as a special issue of the Journal of Urban Research and Practice

Residential Segregation in Comparative Perspective Kuniko Fujita, 2016-04-08 We know very little about variations in urban class and ethnic segregation among nations and even less about differences among cities in different regions of the world Spatial organization places and neighbourhoods matters significantly in some cities in reproducing class relations and ethno racial hierarchies but may be much less important in others The degree and the impact of segregation depend upon contextual diversity By emphasizing the importance of contextual diversity in the study of urban residential segregation the book questions currently popular urban theories such as global city neoliberal urbanism and gentrification These theories tend to dissociate cities from their national and regional context and thus ignore their history culture politics and institutions The aim of this book is to introduce the significantly different urban experiences in social and spatial segregation patterns and rationales which exist among the world's regions and to demonstrate that urban theory needs to draw systematically upon this wide range of experiences The cities selected Athens Beijing Budapest Copenhagen Hong Kong Madrid Paris São Paulo Taipei and Tokyo

were chosen in order to achieve geographical spread to maximise the diversity of types of socioeconomic regulation This volume is thus able to avoid the interpretative limitations and misconstructions resulting from universalizing the Anglo American experience

Employment Deconcentration in European Metropolitan Areas Eran Razin, Martin Dijst, Carmen Vázquez, 2007-09-06 European metropolitan areas have experienced a marked reorganization associated with the processes of globalization and the European integration of economic activities on various spatial scales Much of this change is particularly evident at the edge of central cities further away at suburban locations and on the fringes of expanding metropolitan areas These spatial processes of urban expansion sprawling development and employment deconcentration present constant challenges to urban quality of life raising concerns about excessive consumption of land and energy traffic congestion and so forth These concerns prompt the formulation of public policies at various levels of government European Union agencies national and sub national public authorities The challenges posed by the spatial reorganization of economic activities within European metropolitan areas and their implications for the quality of life inspired the research project

sponsored by the European Commission 5th Framework entitled Spatial Deconcentration of Economic Land Use and Quality of Life in European Metropolitan Areas SELMA The primary goal of SELMA was to design urban planning and management strategies to ensure the maintenance of the quality of life in European metropolitan areas To this end three broad activities were defined The first focused on the identification and analysis of the driving forces and dynamics behind the process of economic land use deconcentration in metropolitan areas An analysis of the impacts of these processes on urban quality of life formed the heart of the second activity

Cultural Landscapes of Post-Socialist Cities Mariusz

Czepczynski,2016-04-22 The cultural landscapes of Central European cities reflect over half a century of socialism and are marked by the Marxists vision of a utopian landscape Architecture urban planning and the visual arts were considered to be powerful means of expressing the people s power However since the velvet revolutions of 1989 this urban scenery has been radically transformed by new forces and trends infused by the free market democracy and liberalization This has led to landscape cleansing and recycling as these former communist nations used new architectural functional and social forms to transform their urbanscapes their meanings and uses Comparing case studies from different post socialist cities this book examines the culturally conditional variations between local powers and structures despite the similarities in the general processes and systems It considers the contemporary cultural landscapes of these post socialist cities as a dynamic fusion of the old communist forms and new free market meanings features and democratic practices of global influences and local icons The book assesses whether these urbanscapes clearly reflect the social cultural and political conditions and aspirations of these transitional countries and so a critical analysis of them provides important insights

Heiderose Kilper, 2009-09-18 Preface Introduction 1 Heiderose Kilper New Disparities in Spatial Development in Europe
several topics are included in both the title and theme of the German Annual of Spatial Research and Policy for the Year 2009
We are first of all concerned with the concept of spatial disparities which has its roots in national spatial planning and spatial development policy Regional development as interregional equalisation policy for example is well anchored in the German constitution through fundamental legal standards and the division of powers among the respective federal states The establishment of uniform living conditions within the federal territory and securing the uniformity of living conditions beyond the borders of any single federal state Section 72 Paragraph 2 of German Basic Law GG are expressly specified as aims of government action in the constitution of the Federal Republic of Germany With the major reform of Germany's financial system in 1969 and incorporation of the joint task Improvement 1 of the Regional Economic Structure in Section 91a of German Basic Law GG interventions on the part of the federal government and the wealthy federal states for the benefit of states and regions with less economic success were legitimised in constitutional terms as well All of this would be inconceivable without the concept of spatial disparities
