## **Social And Biological Roles Of Language The Psychology Of Justification:**

*Social and Biological Roles of Language* Richard Totman, 1985 This volume is an integrative theoretical exploration of the essential links between a person's social adaptation and his or her biological survival Language and speaking practices are thought to be closely tied in with social phenomena and so too the discussion of the way people use words runs through the analysis of the nature of stress and its physiological effects The ideas developed have implications both for our understanding of what stress involves and for the psychology of individuals and communities FROM THE PREFACE One of the exciting things about contemporary social psychology is that its discussions seem to be entering more cosmopolitan ground Traditional research programmes have been justly criticised for their insularity because of the incommensurability of their categories and distinctions researchers do not talk to each other This book is written in the hope that the days of insularity may be coming to an end and that the way is open to a sharing of debates about matters of social importance among those schooled in different academic subjects It is divided into three parts In the first part the social psychologist's title to a specialist vocabulary and methodology is questioned and the assumption that research based on an ideal of specialism can in principle reflect general social laws and truths is challenged The more theoretically constructive project of the book begins with Part II The argument is developed that theories in social psychology have evolved not as a result of specialist research programmes but on different grounds Their course has more to do with a changing metaphysics than with data specifically a changing perspective on men and women as rational freely choosing moral agents Relatedly our conception of what is meant by social has changed too

**The Myth of Social Action** Colin Campbell,1998-07-09 The Myth of Social Action first published in 1996 is a powerful critique of the sociology of the time and a call to reject the prevailing orthodoxy Arguing that sociological theory had lost its way Colin Campbell mounts a case for a new dynamic interpretivism a perspective on human conduct which is more inkeeping with the spirit of traditional Weberian action theory Discussing and dismissing one by one the main arguments of those who reject individualistic action theory he demonstrates that this has been wrongly rejected in favour of the interactional social situationalist approach now dominating sociological thought

*The Rupture* Olivia Fane,John B. Harris,2020-10-08 The sublime rests precariously on the edge of the abyss This volume is a collaboration between wordsmith Olivia Fane and painter John B Harris Fane s first essay is on the philosophical understanding of the sublime The sublime first became a subject of serious philosophical thought in the eighteenth century thanks to Edmund Burke and Immanuel Kant Fane argues for an interpretation of the sublime as the radically other and argues that its function is primarily epistemological in that it reveals to us our own being and finitude She goes on to show how this tallies with ideas of negative theology and post modernism In her second chapter A Short Essay on Truth Fane suggests that societies and cultures suffer from a hermeneutic circle of knowledge in other words knowledge is based on agreement rather than authentic understanding She shows how the function of art and religion at their best is to attempt to break through the circle

turning us from sleepwalkers into people who are alive to a truth which is paradoxically unknowable The third chapter Fear and Longing A Symposium is named after the painting on the book s cover and is a dialogue between Harris and Fane on the apprehension of the sublime exploring the syzygy between images and words intimation and explication
