Social Care Markets Progress And Prospects:

Social Care Markets Gerald Wistow, 1996 Based on detailed research in twenty five local authorities this book focuses on initial experiences of and attitudes towards operating within social care markets It examines perspectives on and capacities to implement the community care reforms and locates them within conceptual and policy frameworks which help us identify implications for local authorities private and voluntary sector providers central government and the research community Generally local authorities have moved from a relatively crude anti commercialism to a belief that the market is capable of delivering benefits to users and carers However there is relatively little evidence that authorities have developed understandings of how to use the market to achieve social goals Market Research in Health and Social Care Mike Luck, Rob Pocock, Mike Tricker, 2003-09-02 The shift to managed markets has meant that whilst planners and purchasers of health and social services seek information on needs managers who provide these services seek information on performance and response Market research contributes to both This text is a comprehensive and rigorous introduction to the relevance planning and management of market research in the areas of health and social care that have developed in Britain and most other industrialised countries It features an explanation of how managed markets provide the context for market research a comprehensive guide to choosing the appropriate survey method recommendations for commissioning monitoring and implementing results practical advice on producing successful student projects a comparative international perspective Intended for managers and students of public sector management and marketing this outstanding book contains instruction on research methods practical advice for managers and professionals on how to commission monitor and implement the results of market research and an excellent selection of case studies *The Welfare State in Post-Industrial Society* Jason L. Powell, Jon Hendricks, 2009-06-10 In recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe Multinational corporations NGOs and other international organizations have begun to influence social policy at a national and local level Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level With contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state *The Welfare State in Post Industrial Society* is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization *The Welfare State in Post Industrial Society* seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling

to provide social welfare support for their needy populations *The Voluntary Sector in the United Kingdom* Jeremy Kendall, Martin Knapp, 1996 This book provides an analytical overview of the vast range of historiography which was produced in western Europe over a thousand year period between c 400 and c 1500 Concentrating on the general principles of classical rhetoric central to the language of this writing alongside the more familiar traditions of ancient history biblical exegesis and patristic theology this survey introduces the conceptual sophistication and semantic rigour with which medieval authors could approach their narratives of past and present events and the diversity of ends to which this history could then be put By providing a close reading of some of the historians who put these linguistic principles and strategies into practice from Augustine and Orosius through Otto of Freising and William of Malmesbury to Machiavelli and Guicciardini it traces and questions some of the key methodological changes that characterise the function and purpose of the western historiographical tradition in this formative period of its development **Management, Social Work and Change**

data so far made for the comparison of the two countries based on matched area samples collecting comparable information about cohorts of new users on two or more occasions The book also shows how the need related circumstances of users differ between countries and within each country between areas The book shows how and why higher levels of the French cash benefit for community care had more effect on the central policy goal than its British counterpart how higher levels of services generally had little impact on it in either country but on average how the effect of the British services were much greater

Strategy Mix for Nonprofit Organisations Annette E. Zimmer, Christina Stecker, 2013-03-19 In many countries particularly in continental Europe societies have been plagued by high unemployment for several decades Simultaneously due to recent shifts from industrial to service oriented post industrial societies labor as a significant culture code is increasingly losing importance Because of this the third or voluntary sector as a place of employment and as a service agency to society has become important for Europe as indicated by the 1997 Communication of the European Commission and various declarations by the European Parliament and the EU's Economic and Social Council *Strategy Mix for Nonprofit Organizations Vehicles for Social and Labor Market Integration* explores the role of the third sector in Europe where unemployment is high and in North America where unemployment is rising and exploring the gaps that the third sector is fulfilling both as a social service and as an employer The volume is organized into two distinctive parts Part 1 The Nonprofit Sector and Social Integration highlights the embeddedness of the sector in selected countries it discusses how the sector is currently affected by changes of public policy particularly in the traditional social democratic welfare state regimes and it draws our attention to the sector

s potentials to provide avenues for social integration self actualization and civic empowerment Part 2 Labor Concepts and Market Integration refers to the multifunctionality of third sector organizations discussing potentials of workplace as well as community involvement via nonprofit organizations This seminal volume will be of interest to those in the nonprofit sector organizational management and economics political scientists and other researchers working with nonprofit organizations and civil society studies on an international level *Families in Ageing Societies* Sarah Harper,2004-09-02 Western families are undergoing considerable change The demographic ageing of societies is increasing the number of living generations and decreasing the number of living relatives within these generations These ageing societies are also seeing an ageing of some life transitions with individuals choosing to delay full economic independence from parents formal adult union through marriage or committed long term cohabitation and parenting Such demographic change is occurring within the context of a variety of new kin structures stepfamilies ethnic minority families single parent families cohabiting couples This volume takes an inter disciplinary research approach to consider the implications of demographic ageing for European and American families Sectors Matter! Stefan Mann,2011-06-10 Although all economic activities take place in sectors economists often devote little attention to differences between and characteristics of sectors This book tries to show that mesoeconomics the economic exploration of sectors and groups is a useful instrument of analysis between microeconomics the analysis of markets and macroeconomics the analysis of economies In order to do so economists and social scientists from related disciplines and coming from Europe Australia and Asia demonstrate that sectors matter for economic development and the formation of societies The book includes chapters with rigorous economic analysis outlooks on economic history and case studies in order to show the relevance of sectoral issues this broad range of content making it likely the most comprehensive book on mesoeconomics to date **Nordic Welfare States in the European Context** Johan Fritzell,Bjorn Hvinden,Mikko Kautto,Jon Kvist,Hannu Uusitalo,2005-07-28 This important sequel to Nordic Social Policy Routledge 1999 compares welfare state development over the last twenty years in Denmark Finland Norway and Sweden with that of Germany the Netherlands the United Kingdom and other Western European countries Topics covered include income distribution health inequalities and gender equality gender policies health and social care services and policy reaction to family changes social security and employment policies financing of welfare states In the context of globalisation ageing populations changing employment patterns and rising inequalities Nordic Welfare States in the European Context offers an empirical analysis of welfare adaptations and a lively discussion of the historical development of European social policy It finds a greater ambiguity regarding variation and trends than is commonly suggested Contrary to expectation there is little evidence of the Europeanisation of Nordic welfare states rather the reverse The comparable and empirical data used in this study make it a unique contribution to understanding current trends in European social policy **Bureaucrats and Leadership** K. Theakston,1999-12-07 The book uses a biographical approach to analyse the potential for forms of and constraints upon

bureaucratic leadership in modern government Case studies written by experts in the different fields assess the impact of particular officials operating in Whitehall the United States federal government the health service local government and Europe The book brings together an innovative methodology with a wide policy coverage *Network Governance and the Differentiated Polity* R. A. W. Rhodes, 2017-07-04 *Network Governance and the Differentiated Polity* is the first of two volumes featuring a selection of key writings by R A W Rhodes Volume I collects in one place for the first time the main articles written by Rhodes on policy networks and governance between 1990 and 2005 The introductory section provides a short biography of the author s journey Part I focuses on policy networks and Part II focuses on governance The conclusion provides critical commentary both replying to critics and reflecting on theoretical developments since publication The volume complements the author s other publications on networks and governance and many chapters in the volume feature an afterword setting out the context in which it was written and identifying what has changed empirically Volume II looks forward and explores the interpretive turn and its implications for the craft of political science especially public administration **Complex Policy Planning** Philip Haynes, 2018-08-13 First published in 1999 this book examines recent developments in the application of chaos and complexity theory to the applied social sciences and the implications for the government planning of social care services The study argues that there are fundamental limitations to traditional government political and managerial planning structures Chaos and complexity theory shows that the effects of time and space are critical aspects for planners to consider Small changes in isolated social or individual factors can have larger scale effects on the future validity of a policy programme In particular rigid linear statistical calculations like the Government Standard Spending Assessment can undermine the ability of local authorities to make realistic plans It is proposed that government political strategies and managerial methods of analysis need to better understand the complexity of information available to them New political and institutional typologies are required if planning activity is to evolve to be of optimal social value
