Routledge International Handbook of Clinical Suicide Research John R. Cutcliffe, José Santos, Paul S. Links, Juveria Zaheer, Henry G. Harder, Frank Campbell, Rod McCormick, Kari Harder, Yvonne Bergmans, Rahel Eynan, 2013-10-15 Suicide remains one of the most pressing public health concerns across the world. This important reference work collects together a wide range of research around suicide and suicide prevention in order to guide future research and provide guidance for professionals about the best way to respond meaningfully to suicidal patients. Responding to the need for multi-disciplinary and international research to deepen our understanding of suicide, it demonstrates where our knowledge is firmly evidence-based and where new areas for research are emerging, as well as highlighting where we know little. Divided into six parts, each with its own editorial introduction and commentary, it explores research with and about survivors of suicide and indigenous populations. The remaining sections look at suicide-focused research in psychiatric nursing, psychiatry, psychology, and social work, and allied health. It is of interest to all advanced students, practitioners, and scholars interested in suicide and its impact and prevention.

Mindfulness in Cognitive Behavior Therapy James D. Herbert, Evan M. Forman, 2011-02-25 Praise for Acceptance and Mindfulness in Cognitive Behavior Therapy Understanding and Applying the New Therapies One of the most fruitful aspects of the encounter between classical Buddhist knowledge and modern science has been the emergence of new therapeutic and educational approaches that integrate contemplative practice such as mindfulness and contemporary psychology methods such as those of cognitive therapy The systematic approach of this book wherein the insights of both classical Buddhist and contemporary psychology are integrated represents a most beneficial and powerful method of ensuring a healthy mind and heart His Holiness the Dalai Lama What has been missing in the midst of partisan battles between orthodox CBT therapists and enthusiastic proponents of newer acceptance mindfulness approaches is a reasoned scientifically grounded discourse that would help researchers and clinicians alike sort through the various claims and counterclaims This book skillfully conceived and edited by James Herbert and Evan Forman provides just such a sober and open minded appraisal of a trend that has sometimes suffered both from too much hype from one side and too sweeping a rejection by the other This volume encourages careful consideration of both positions and can advance evidence based psychosocial therapy both conceptually and procedurally to the benefit of all From the Foreword by Gerald C Davison PhD University of Southern California

International Handbook of Cognitive and Behavioural Treatments for Psychological Disorders V.E. Caballo, 1998-11-27. This handbook shows the wide perspective cognitive behavioural treatment can offer to health professionals; the vast majority of whom now recognize that cognitive behavioural procedures are very useful in treating many mental disorders, even if certain disciplines continue to favour other kinds of treatment. This book offers a wide range of structured programmes for the treatment of various psychological/psychiatric disorders as classified by the DSM-IV. The layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment. It is divided into seven sections covering anxiety disorders, sexual disorders, dissociative, somatoform, impulse control disorders, emotional disorders, and psychotic and organic disorders. Throughout the twenty-three chapters, this book offers the health professional a structured guide with which to start tackling a whole series of mental disorders and offers pointers as to where to find more detailed information. The programmes outlined should, it is hoped, prove more effective than previous approaches, with lower economic costs and time investment for the patient and therapist.
