Tableaux de maîtres anciens et groupe en marbre ,1860 **Soviet Men of Science** Ivan Turkevič,1963 *Man and Science* Sven Rasegård,2002 Rasegård a member of the Society of Living Systems presents a report that promotes the Society's view that systems science should be seen as an overarching discipline for science political science and many other fields Examples from municipal planning and welfare systems are provided The work of Karl Popper is brought in to support the argument Annotation copyrighted by Book News Inc Portland OR **The Afterlife of the 'Soviet Man'** Gulnaz Sharafutdinova,2023-01-26 Almost three decades after the collapse of the Soviet Union today more often than ever global media and intellectuals rely on the concept of homo sovieticus to explain Russia's authoritarian ills Homo sovieticus or the Soviet man is understood to be a double thinking suspicious and fearful conformist with no morality an innate obedience to authority and no public demands they have been forged in the fires of the totalitarian conditions in which they find themselves But where did this concept come from What analytical and ideological pillars does it stand on What is at stake in using this term today The Afterlife of the Soviet Man addresses all these questions and even explains why at least in its contemporary usage this concept should be abandoned altogether **The Art and Science of Making the New Man in Early 20th-Century Russia** Yvonne Howell,Nikolai Kremmentsov,2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten

champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind
