Soviet Military Aircrafts In Monino:

Soviet Strategic Bombers Jason Nicholas Moore, 2018-06-30 The history of Soviet strategic bombers after the Second World War is a fascinating one from the reverse engineering of interned American Boeing B 29 bombers into the first Soviet strategic bomber the Tu 4 to the huge jet and turbo prop powered aircraft of today s Russian Air Force This comprehensive history of these aircraft will deal not just with the development of aircraft that entered service but of experimental aircraft as well and projects that were never even built will also be explored The service life of these bombers will be covered including both active and retired aircraft and their use outside of the Soviet Union in places such as the Middle East and Afghanistan will be described in detail The Soviet Union built some of the first jet powered strategic bombers and the Tu 95 Bear the only swept winged turbo prop bomber to ever enter service remains in service to this day Less successful aircraft like the graceful but problem plagued supersonic Tu 22 Blinder and the Mach 3 Sukhoi T 4 will also be examined

Soviet Bombers of the Second World War Jason Nicholas Moore, 2019-09-08 Soviet bombers were a varied lot during the Second World War ranging from single engined biplanes such as the 1920 s era Polikarpov U 2 to the excellent and modern twin engined Tu 2 medium bomber Although the use of four engined strategic bombers was mostly limited to use of the huge Pe 8 bomber the Soviets used many other aircraft for both strategic and tactical bombing As the bombers of the Red Air Force were mainly tasked with supporting the Red Army most of the bombers were used for tactical bombing attacking tanks troop convoys trains and airfields This book will deal with both strategic bombers and tactical bombers but will concentrate on the smaller tactical bombers as this is where the Red Air Force s emphasis lay Such types as the Il 4 the Su 2 the aforementioned Tu 2 and the most important bomber of all the Il 2 Shturmovik attack bomber will be described in great detail including not only details on the aircraft themselves but how they were deployed in combat The one truly strategic bomber the Pe 8 will not be forgotten and neither will the comparatively tiny U 2 biplane which was so effective in its use as a night time nuisance raider that the Germans copied the tactic wholesale Accurate colour profiles in some number will accompany the text in this comprehensive work on Soviet bombers

important perspective into the broader theme of Russia's great communist experiment *Soviet Air Force Theory, 1918-1945* James Sterrett, 2007-01-24 This new book examines the development of Soviet thinking on the operational employment of their Air Force from 1918 to 1945 using Soviet theoretical writings and contemporary analyses of combat actions

Foundations of Russian Military Flight, 1885-1925 James K Libbey, 2019-05-15 Foundations of Russian Military Flight focuses on the early use of balloons and aircraft by the Russian military The best early Russian aircraft included flying boats designed by Dimitrii Grigorovich and large reconnaissance bombers created by Igor Sikorsky As World War I began the Imperial Russian Navy made use of aircraft more quickly than the army Indeed the navy established a precursor to the aircraft carrier The Imperial Russian Army came to respect over time the work of aircraft that evolved from reconnaissance and bomber to fighter planes Over 250 army pilots during the war received awards of high distinction for their wartime flights After the 1917 revolution both the new Bolshevik government and the reactionary White forces created air arms to combat each other In the 1920s the Soviet Union and Germany negotiated agreements that allowed Germany to violate the Treaty of Versailles by building military aircraft and training German military pilots in the USSR This provided the Soviet Union access to the latest aviation technology and prevented them from falling too far behind the West in this crucial sphere
