Soviet Naval Doctrine And Policy 1956 1986 Studies In Russian History Volume 8b:

Soviet Naval Doctrine and Policy, 1956-1986 Robert Waring Herrick, 2003 En omfattende undersøgelse og analyse af den sovjetiske flådepolitik og flådedoktrin fra 1956-1986 Den sovjetiske flådes chef admiral S G Gorshkov indrede i sin tid som flådechef den sovjetiske flåde fra at være en kystflåde til at være en moderne flåde der kunne operere overalt i verden på lige fod med andre stormagts flåder The Sound of Freedom James P. Rife, Rodney P. Carlisle, 2006 Tells the story of the evolution of the Dahlgren Laboratory from a proof and test facility into a modern research and development center crucial to the technological evolution of the United States Navy *Soviet Cold War Attack Submarines* Edward Hampshire, 2020-09-17 In this highly detailed book naval historian Edward Hampshire reveals the fascinating history of the nuclear powered attack submarines built and operated by the Soviet Union in the Cold War including each class of these formidable craft as they developed throughout the Cold War period The November class which were the Soviet Union's first nuclear submarines had originally been designed to fire a single enormous nuclear tipped torpedo but were eventually completed as boats firing standard torpedoes The Alfa class were perhaps the most remarkable submarines of the Cold War titanium hulled which was light and strong but extremely expensive and difficult to weld successfully crewed with only thirty men due to considerable automation and 30% faster than any US submarines they used a radical liquid lead bismuth alloy in the reactor plant The Victor class formed the backbone of the Soviet nuclear submarine fleet in the 1970s and 1980s as hunter killer submarines began to focus on tracking and potentially destroying NATO ballistic missile submarines The Sierra classes were further titanium hulled submarines and the single Mike class submarine was an experimental type containing a number of innovations Finally the Akula class were being constructed as the Cold War ended and these boats form the mainstay of the Russian nuclear attack submarine fleet today This book explores the design development and deployment of each of these classes in detail offering an unparalleled insight into the submarines which served the Soviet Union throughout the Cold War period The text is supported by stunning illustrations photographs and diagrams of the submarines **Forthcoming Books** Rose Army, 2003-04 **The British National Bibliography** Arthur James Wells, 2003 **Subject Guide to Books in Print**, 1996 International Journal of Maritime History, 2005 **Soviet Naval Doctrine and Policy, 1956-1986** Robert Waring Herrick, 2003 The Military History of Tsarist Russia F. Kagan, R. Higham, 2016-04-30 The Military History of Tsarist Russia examines Russian military history from the rise of the Muscovite state to the present even peeking briefly into the future The volume covers Russia's land forces extensively but also covers the development of the Russian Navy and the creation and development of the Russian Air Force parts of the Russian military machine that are frequently neglected in general writings The historical analysis addresses the development and function of the Russian military whether in peace or in war as well as the impact of war and changes in the military upon Russian society and politics Questions of military organization doctrine and technique are paramount as well as the critical question of the interface between the armed forces

and society **General Naval Tactics** Milan Vego, 2020-10-15 In *General Naval Tactics* Naval War College professor and renowned tactical expert Milan Vego describes and explains those aspects of naval tactics most closely related to the human factor. Specifically, he explains in some detail the objectives and methods, elements of tactical employment of naval forces, command and control, combat support, tactical design, decision making and planning, execution, leadership, doctrine, and training. Vego derives certain commonalities of naval tactics that occurred in recent and distant wars at sea. Many parts of his theoretical constructs are based on works of a number of well known and influential naval theoreticians such as Admirals Alfred T. Mahan, Bradley A. Fiske, Raoul Castex, and Ren Daveluy, and influential naval theoreticians. Whenever possible, the author illustrates each aspect of theory by carefully selected examples from naval history, making the theory more understandable and interesting. Vego aims to present theory that is general in nature and therefore more durable in its validity. The more general the theory, the greater the possibility of accommodating changes based on new interpretations of past events and as a result of gaining fresh insight from the lessons learned.
