Soviet Union Under Gorbachev Prospects For Reform:

The Soviet Union under Gorbachev (Routledge Revivals) David A. Dyker, 2013-09-13 Gorbachev's accession to General Secretary promised great changes to the Soviet Union and its relationship with the rest of the world. This book first published in 1987 discusses the problems faced by Gorbachev when he entered office and how he planned to tackle them. Gorbachev was a figure of genuine debate in the mid 1980s raising doubts from Western specialists regarding his radicalism and ability to reform the Soviet economic system in particular. Here Dyker and his colleagues assess the changes Gorbachev had already made to consolidate his power base alongside those that he was proposing to make to agriculture industry and foreign relations at the time of publication. The book speculates about how Gorbachev might implement his proposed political and economic reforms what opposition he might encounter and how successful he would be. A fascinating insight into Soviet economic and political policy in the years leading up to the Union's collapse this work will be of particular importance to students and academics researching the personality of Gorbachev and the political and economic history of the Soviet Union.

Remaking the Economic Institutions of Socialism Victor Nee, David Stark, 1989 To what extent can contemporary socialist economies be reformed by the introduction of markets? The question is usually debated in either a Chinese or an East European context. This collection of

eleven essays is unique in taking the first steps toward a comparative analysis Twenty years of experience with reforms in Hungary and a decade of experimentation with reforms in China provide a critical mass of evidence for analyzing the problems endemic to centrally planned economies and the dilemmas faced in efforts to reform them In reflecting on the Chinese and East European experiences these essays trace the shift from a conception of reform as a mix of planning and markets within the state sector to a socialist mixed economy with implications for the emergence of new social groups and autonomous social organizations The essays exemplify a new perspective in the study of state socialism that changes the focus from ideologies to economic institutions examining how the activities of subordinate groups place limits on the power of state elites The authors include scholars who have shaped debates in Eastern Europe and whose work is now stimulating much discussion in China as well as representatives of a younger generation of economists sociologists and political scientists writing on the basis of field research recently conducted in factories cities and villages in China and Eastern Europe The contributors are Wlodzimierz Brus Walter D Connor Zhiren Lin Victor Nee Susan Shirk David Stark Ivan Szelenyi and Martin King Whyte An introductory essays surveys recent theories and research on state socialism and outlines a new institutional perspective for understanding the dilemmas of partial reforms the political cycles of reform and retrenchment and the role of subordinate groups in stimulating changes outside the state sector

Restructuring the Soviet Economy

Dyker, 2002-01-31 Restructuring the Soviet Economy examines the Soviet leadership's most urgent question how to revitalize the Soviet economy David Dyker argues that the current impasse can only be understood in the context of the failure of 60 years of central planning He analyses both the problems besetting the centrally planned system and those that have paralysed perestroika and assesses whether the most ambitious attempt ever to reform the Soviet economy will succeed

economic and political developments and the crucial connections between them There is a generous introduction and overview to help the reader find his or her way around The material covers the period up to late autumn 2000 and thus offers a valuable guide to policies in the Putin era Bureaucracy: Three Paradigms Neil Garston, 2012-12-06 The study of bureaucracy must include certain key questions what are bureaucrats and bureaucracies why do they exist and what are their functions how do they behave how much power do they possess what is their impact on efficiency and production and how do they affect society This book contains analyses of all these issues done by a variety of economists of differing backgrounds approaches and opinions broadly categorized under the labels Neoclassical Institutional and Marxist although there are overlaps and correspondences that cross ideological and or paradigm boundaries In this book the labels are employed as a guide to the reader with a preference for one approach over the others and as an indication of how chapters in different sections are related in their approaches
