Soviet Warships 1945 To The Present:

Soviet Warships John Jordan, 1992 **Warships of the Soviet Fleets 1939-1945** Przemyslaw Budzbon, Jan Radziemski, Marek Twardowski, 2024-01-05 Seventy five years after the end of the Second World War the details of Soviet ships their activities and fates remain an enigma to the West In wartime such information was classified and after a brief period of glasnost openness the Russian state has again restricted access to historical archives Therefore the value and originality of this work is difficult to exaggerate It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy listing over 6200 vessels from battleships to river gunboats and mercantile conversions as well as purpose built warships Divided into three volumes this first covers major surface warships down to MTBs and armored gunboats as well as submarines For every class there is a design history analyzing strategic tactical and technical considerations and individual ship detail includes construction yard key building dates commissioning fleet designations relocations and ultimate fate Once a closely guarded secret the wartime loss of every ship and boat over 1000 is described Furthermore the confusion caused by frequent name changes is clarified by indexes that run to 16 000 items By following the ships through both their wartime and earlier history the book reveals many aspects of Russian history that remain highly sensitive clandestine co operation with Weimar Germany and fascist Italy the NKVD enforced closure of Soviet borders the Gulag Fleet the faked Metallist sinking that excused the military occupation of Estonia and the ill conceived pact with Nazi Germany Restrictions recently imposed on historical publications in Russia mean this book could certainly not have been published there as proven by the fact that most of the authors Russian collaborators preferred not to disclose their identities This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships the Soviet Navy or wider maritime aspects of the Second World War *The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual* Ron Martini, 2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal **Stalin's Ocean-going Fleet** Mikhail Monakov, Jurgen Rohwer, 2012-11-12 A study of the development of strategic concepts in Stalin's Navy in the context of his foreign defence policy using original archival documents translated from the Russian Modern Warships Kit Bonner, Carolyn Bonner, 2007 **Encyclopedia of Military Technology and Innovation** Stephen Bull, 2004-06-30 From the Abrams M1 tank to the zeppelin this essential reference details the invention and evolution of

nearly 600 of the most important advances in military technology from prehistory to the present International in scope it covers weapons ammunition defenses land vehicles aircraft ships detection stealth gear supplies weapons of mass destruction and much more Whether researching such cutting edge technologies as the B 2 Stealth Bomber Patriot Missile and the Roborat project or such historical topics as forts Molotov cocktails or the U 2 Encyclopedia of Military Technology and Innovation is a must have reference Warfare and national defense have provided a strong stimulus for technological advances throughout history This reference provides students and researchers from high school through college scholars and the general public essential information historical perspective and scientific context to understand better the development capabilities and uses of major military technologies Fifty illustrations helpful cross references a bibliography and an index help users navigate this reference and supplement their research

Soviet Cold War Guided Missile Cruisers Edward Hampshire,2017-01-26 Heavily armed and formidable guided missile cruisers formed the core of the Soviet Navy during the Cold War From the last class of conventional Sverdlov class cruisers through to increasingly complex and formidable missile cruisers these ships ensured that NATO took the Soviet naval threat seriously Soviet Cold War Guided Missile Cruisers covers all classes of these impressive warships from the early Sverdlov through the Kynda Kresta Kara and Slava to the enormous Kirov classes Together these vessels marked the apogee of Soviet naval technology and capability and they remain today the largest non aircraft carrier warships built since 1945 Containing material previously only available in Russian and fully researched from specialist defence journals this comprehensive volume examines the design development and intended role of these impressive hi tech warships and recounts their dramatic operational history as NATO and Soviet warships faced off against each other during the long Cold War at sea

HMS London Iain Ballantyne,2002-06-06 A fascinating and lively account of the lives of British warships named London looking at history from the perspective of the men who were there There is no current warship in the Royal Navy called HMS London but vessels carrying the name have featured in some of the most controversial episodes of British naval history For example the wooden wall battleship HMS London of the late 18th century could be called the ship that lost America while the heavy cruiser of WW2 was command vessel for the escort force that failed to safeguard the controversial convoy PQ17 Examining the stories of HMS Londons all the way from the English Civil War through the Battle of Copenhagen in 1801 where Nelson famously ignored signals to break off the action displayed by HMS London we also learn of the pre dreadnought London s participation in the ill fated Dardanelles campaign of WW1 Among the people Iain Ballantyne interviewed for this book were veterans of the Arctic convoys of WW2 the Yangtse Incident and warriors of the Cold War and 1991 Gulf War It all adds up to a thoroughly researched and exciting narrative of naval history Adding to the authenticity of the tale Iain even sailed to Russia in the last HMS London a Type 22 guided missile frigate in August 1991 During a WW2 convoy re enactment the ship was almost hit by a practice torpedo launched from a Soviet submarine and had to take evasive action

Undersea Warriors Iain Ballantyne,2019-09-03 Undersea Warrior a

submarine designed to pursue and attack enemy submarines and surface ships using torpedoes This will follow the careers of four daring British submarine captains who risked their lives to keep the rest of us safe their exploits consigned to the shadows until now Their experiences encompass the span of the Cold War from voyages in WW2 era submarines under Arctic ice to nuclear powered espionage missions in Soviet dominated seas There are dangerous encounters with Russian spy ships in British waters and finally as the communist facade begins to crack they hold the line against the Kremlin s oceanic might playing a leading role in bringing down the Berlin Wall It is the first time they have spoken out about their covert lives in the submarine service This is the dramatic untold story of Britain s most secret service **Ships Monthly** ,1996
