Naval Policy and Strategy in the Mediterranean John B. Hattendorf, 2013-11-05 Maritime strategy and naval power in the Mediterranean touches on migration, the environment, technology, economic power, international politics and law as well as calculations of naval strength and diplomatic manoeuvre. These broad and fundamental themes are explored in this volume.

Navies and Foreign Policy (Routledge Revivals) Ken Booth, 2014-06-27 First published in 1977, this study offers a comprehensive systematic and integrated survey of the important relationship between navies and the making and execution of foreign policy. Ken Booth explains the functions navies can perform in both war and peace, the influence they have on particular situations and how the relevant organisations can affect the character of naval actions. Ultimately, navies are regarded as indispensable instruments of the state by a number of countries, whilst all countries with a coast find some need to threaten a degree of force at sea. This book provides students and academics with the intellectual framework with which to assess the changing character of the navy.

The Rise and Fall of the Soviet Navy in the Baltic 1921-1941 Gunnar Åselius, 2005-01-10 This book, based on extensive work in Russian archives, investigates how strategy, organisational rivalry and cultural factors came to shape naval developments in the Soviet Union up to the invasion of 1941.

Soviet Naval Forces And Nuclear Warfare James J. Tritton, 2019-06-26 Based on formal content analysis of the writings of Admiral Sergei G. Gorshkov and past Soviet ministers of defense and heads of the Politburo, James J. Tritton interprets what the Soviets say they will do in the event of nuclear war. He then constructs a hardware and exercise analysis of the strategic employment of the Soviet Navy in a nuclear war, offering three possible cases: the *bolt from the blue* with existing forces on patrol, full mobilization, and a plausible case of partial mobilization. In addition, Dr. Tritton examines from a Soviet perspective concepts of deterrence, the strategic goals and missions of the fleet, nuclear targeting policy, the Sea Lines of Communication (SLOC) disruption mission, and the potential for tactical nuclear warfare limited to the sea. The author concludes by assessing the implications of Soviet politico-military planning for Western defense strategy and arms control.

One Hundred Years of Sea Power George W. Baer, 1996-07-01 A navy is a state's main instrument of maritime force. What it should do, what doctrine it holds, what ships it deploys, and how its fights are determined by practical political and military choices in relation to national needs. Choices are made according to the state's goals, perceived threat, maritime opportunity, technological capabilities, practical experience, and not the least, the way the sea service defines itself and its way of war. This book is a history of the modern U.S. Navy. It explains how the Navy

in the century after 1890 was formed and reformed in the interaction of purpose experience and doctrine
