

Informing and public confession were introduced as his tools of control. When a critic protested against appointment of party secretaries of regions as a retrogression from the elective system of earlier days, he was told that the appointive system represented an advance in party democracy.

Power was concentrated during the period of this volume not only by party reorganization but by state reorganization. A federation created a form for a measure of autonomy in the federating republics, but in practice the constitutional provisions became dead letters because of the subordination of the government apparatus to the party hierarchy. This was made more apparent after Lenin's death by the assignment to government positions of persons of second-rank party standing.

Not all of Carr's explanations ring true. For example, one can quarrel with his assertion that RSFSR codes were copied by the other republics because these latter lacked legal talent. The Ukrainian Republic's little-read law journal of the time provides evidence of Ukrainian legal talent restless under the obligation enforced upon it to follow RSFSR models. The dictation from headquarters was, in fact, even more severe than Carr claims.

Carr's thesis in this volume has been amply documented in recent years by several monographs on the history of the Communist Party, of the Kom-somol, of the Soviet federation, and of judicial institutions. What he says is now known and accepted in the Western world. Still, his volume is rewarding even for authors of the monographs, for he has a concept of the sweep of history that takes impressive form when all the various threads are woven together as they can be only in a monumental study of them all. Previous volumes have been criticized by some reviewers as showing too much of a sense of "inevitability" and failure to assess the alternatives that might have been developed. Given Carr's analysis of Stalin, these alternatives probably seemed unreal to him, and the impression is still given, although in much less distinct form, that it would have been hard to conceive of a Bolshevik-dominated governmental system that could have moved in any other direction, especially with a personality like Stalin's at the helm. Time will tell whether current leaders can reverse the trend, or whether they really hope to do so.

Hearings, Reports and Prints of the Senate Committee on Government Operations United States. Congress. Senate. Committee on Government Operations, 1969 **EURATOM and Nuclear Safeguards** Darryl A. Howlett, 1990-06-18 The focus of attention in this book centres on the regional nuclear safeguards system implemented in Western Europe by EURATOM the issues surrounding its establishment and the reasons to account for its so far enduring character The Use of Nuclear Weapons and the Protection of the Environment during International Armed Conflict Erik V. Koppe, 2008-04-25 In 1996 the International Court of Justice delivered an Advisory Opinion on the legality of the use of nuclear weapons in which the Court stated that while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict The present work analyses this conclusion focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment Although the use of weaponry during armed conflict is usually related to the protection of individuals the rapidly emerging appreciation of and the worldwide realization of the intrinsic value of the natural environment as an indispensable asset for the continuation of life including human life on this planet both for present and future generations warrants a thorough and extensive examination of the question of the illegality of the employment of nuclear weapons from the point of view of international environmental protection law The book consists of two parts Part I discusses the historical development and the effects of nuclear weapons Part II discusses the protection of the environment during international armed conflict under *ius in bello* *ius ad bellum* and *ius pacis* Only then is it possible to
