Space And Place Theories Of Identity And Location:

Spaces and Places in Motion Nicole Schröder, 2006 **Space and Place** Erica Carter, James Donald, Judith Squires, 1993

Reflecting the ideas and issues which have found themselves at the forefront of cultural theory and studies this text addresses itself to the dilemmas and predicaments of the often bewildering experience of modern life covering such diverse topics as ethnicity architecture and urban spaces *Space, Place and Gendered Identities* Kathryne Beebe, Angela Davis, Kathryn Gleadle, 2017-10-02

In the last two decades historians have increasingly sought to understand how environments built and otherwise architectural surroundings landscapes and conceptual places and spaces have affected the nature and scope of political power cultural production and social experience The essays in this collection expand upon this already rich field of inquiry by combining an analytical approach sensitive to questions of gender with an exploration of ideas of political space The volume demonstrates how the gendered and political meanings of space be that space domestic or public rural or urban real or imagined or a combination of all these and more are fashioned through the movement of historical actors through space and time Whether in delineating the gendered and politicized space of the pulpit the sickroom the Irish farmyard the London suffrage atelier the domestic space created by the wireless the lesbian scene of rural Canada the eighteenth century ladies closet or the public space within the public history of historic houses the volume demonstrates how the meanings of these spaces are not fixed but are challenged and reformulated This book was originally published as a special issue of *women s History Review*

Encountering Urban Places Lars Frers, 2016-04-29 The aesthetics of urban life offer a curious quality one that is both highly visible and hidden both openly influencing and subtly imprinting These aesthetics participate in the production of places to the way they are built to their resisting materiality to their image in people s minds to advertising and to the way people respond to the place Exploring the encounter with the aesthetics images and material design of urban life this book offers analytic insights into contemporary cities It shows how photography maps and videos play a crucial role in bringing aesthetic dimensions into urban studies This transdisciplinary approach draws on the full spectrum of the visual representation to tie the encounter with the realm of the visual directly and explicitly into the exploration of urban space

The Politics of Sacred Places Nimrod Luz, 2023-09-07 The Politics of Sacred Places is a study of the socio political dimensions of sacred sites in Israel Palestine drawing on over 20 years of in depth ethnographic research which introduces cutting edge theories on secularization struggles for recognition and diversity issues This book focuses on contemporary sacred sites and their socio political meanings for minorities within a hegemonic and a secularizing state system It argues that sacred places provide a space that is less scrutinized by the state and where alternative visions of the socio political may be produced A plethora of sites and case studies are examined including the rural shrine of Maqam abu al Hijja in the lower Galilee the Mosque of Hassan Bek in the heart of Tel Aviv Jaffa and the most disputed sacred place in the region the Haram al Sharif in Jerusalem These sites are explored through mostly a phenomenological lens and in

various contexts from the individual body to the global This book offers a critical analytical study of the socio political aspects of sacred sites in contemporary societies within the broader understanding of scale and the spatial turn in the study of religion

Identity and Integration Bernhard Peters, 2017-03-02 Symbolic boundaries cultural differences and ethnic conflicts have gained significance and new meanings in a global situation characterized by the dissolution of traditional political and societal structures Communications and political and economic interactions increasingly cross the borders of states nations and ethnic communities and yet symbolic borders and separate group identities are nevertheless asserted The perceived efforts of migrants to maintain their cultural and ethnic identities are often blamed as a cause of conflict within nation states This intriguing volume recognizes that migrants with an Islamic background are seen as especially problematic cases Turks are the biggest category among Muslim migrants in Europe and more than one third of all Muslim migrants in Europe are from Turkey Referring primarily to immigration from Turkey this book combines both exemplary case studies of Turks within Europe and theoretical papers with innovative perspectives on the relations between integration and identity

Beyond the Threshold Hein Viljoen, C. N. Van der Merwe, 2007 What happens when we cross a significant boundary We step into an unsettling in between zone where we have to abandon accepted structures and truths Yet this liminal zone can also open up possibilities for inner transformation leading to the birth of a new sense of fellowship Since 1994 South Africans have been experiencing the anxieties of old structures breaking down and of new ones being built a process that South African authors have been powerfully representing and questioning Beyond the Threshold analyzes the transformative powers of liminal states and hybridizing processes in literature Its authors discuss a wide range of intriguing liminal characters dangerous liminal situations and unique transformations in recent books mainly from South Africa These books tell the compelling stories of marginal characters giving their stories moral authority while exploring their transformative possibilities From publisher

The Intelligible Metropolis Nora Pleßke, 2014-08-15 Writings on the metropolis generally foreground illimitability stressing thereby that the urban ultimately remains both illegible and unintelligible Instead the purpose of this

interdisciplinary study is to demonstrate that mentality as a tool offers orientation in the urban realm Nora Ple ke develops a model of urban mentality to be employed for cities worldwide Against the background of the Spatial Turn she identifies dominant urban specific structures of London mentality in contemporary London novels such as Monica Ali s Brick Lane J G Ballard s Millennium People Nick Hornby s A Long Way Down and Ian McEwan s Saturday *Mapping Colonial Spanish America* Santa Arias, Mariselle Meléndez, 2002 The essays inquire into the spatial configurations of colonial Spanish America and its inhabitants as they both relate to issues of alterity identity the economy of geographical representation gender and the construction of the colonial city The volume indicated a variety of essays dealing with different geographical regions including the centers of cultural production such as Mexico and Peru as well as marginalized colonial territories
