Space for Science Simon Schwartzman, 2010-11-01 *The Economic and Social History of Brazil since 1889* Francisco Vidal Luna, Herbert S. Klein, 2014-03-31 This is the first complete economic and social history of Brazil in the modern period in any language It provides a detailed analysis of the evolution of the Brazilian society and economy from the end of the empire in 1889 to the present day The authors elucidate the basic trends that have defined modern Brazilian society and economy In this period Brazil moved from being a mostly rural traditional agriculture society with only light industry and low levels of human capital to a modern literate and industrial nation It has also transformed itself into one of the world's most important agricultural exporters How and why this occurred is explained in this important survey Science in the Twentieth Century John Krige, Dominique Pestre, 2013-11-19 With over forty chapters written by leading scholars this comprehensive volume represents the best work in America Europe and Asia Geographical diversity of the authors is reflected in the different perspectives devoted to the subject and all major disciplinary developments are covered There are also sections concerning the countries that have made the most significant contributions the relationship between science and industry the importance of instrumentation and the cultural influence of scientific modes of thought Students and professionals will come to appreciate how and why science has developed as with any other human activity it is subject to the dynamics of society and politics Companion to Science in the Twentieth Century John Krige, Dominique Pestre, 2003 This work on science in the 20th century represents work in America Europe and Asia It includes such topics as the countries that have made the most significant contributions the relationship between science and industry and the importance of instrumentation *Handbook of Science and Technology Studies* Sheila Jasanoff, Gerald E Markle, James C Peterson, Trevor Pinch, 2001-11-01 This volume represents the social constructivist turn of the field It is evident that social constructivism made a major impact on the field during the 1970s and 1980s The diverse papers included here highlight the role of ethnography in STS In addition we are exposed to new perspectives of the multicultural and gendered nature of knowledge production Science Technology and Society For the most current comprehensive resource in this rapidly evolving field look no further than the Revised Edition of the Handbook of Science and Technology Studies This masterful volume is the first resource in more than 15 years to define summarize and synthesize this complex multidisciplinary international field Tightly edited with contributions by an internationally recognized team of leading scholars this volume addresses the crucial contemporary issues both traditional and nonconventional social studies political studies and humanistic studies in this changing field Containing theoretical essays extensive literature reviews and detailed case studies this remarkable volume clearly sets the standard for the field It does nothing less than establish itself as the benchmark one that will carry the field well into the next century The long awaited Handbook of Science and Technology Studies sponsored by the Society for Social Studies of Science is a truly substantial work both in size and in the breadth of its many contributions It is a rich and valuable

guide to much that is transpiring in the field of Science and Technology Studies In the editors words it is an unconventional but arresting atlas of the field at a particular moment in its history Science Technology Society This book is not only an important resource for practitioners but it also may help to spark the curiosity of those who are outside the field including scientists and engineers themselves and so pull the half seen world of science and technology studies even more fully into the light of day American Scientist The book as a whole is an impressive testimony to the vitality of a burgeoning field New Scientist It reflects the international and interdisciplinary nature of the society An excellent resource Choice

Science, Society and Power James

Fairhead, Melissa Leach, 2003-10-16 In this book James Fairhead and Melissa Leach bring science to the heart of debates about globalisation exploring transformations in global science and contrasting effects in Guinea one of the world's poorest countries and Trinidad a more prosperous industrialised and urbanised island The book focuses on environment forestry and conservation sciences that are central to these countries and involve resources that many depend upon for their livelihoods It examines the relationships between policies bureaucracies and particular types of scientific enquiry and explores how ordinary people the media and educational practices engage with this In particular it shows how science becomes part of struggles over power resources and legitimacy The authors take a unique ethnographic perspective linking approaches in anthropology development and science studies They address critically prominent debates in each and explore opportunities for new forms of participation public engagement and transformation in the social relations of science The Challenges of Education in Brazil

Colin Brock, Simon Schwartzman, 2004-05-10 Education in Brazil has changed intensely over the last several years Access to basic education is nearly universal secondary education has been expanding very rapidly and so too has higher education at both the undergraduate and graduate levels However serious issues remain related to quality equity and inappropriate use of resources Some of these problems are related to the fact that Brazil started to develop its education institutions very late and did not build strong teaching and academic professions that could provide the necessary support for education policies committed to equity quality and efficiency This book written by leading experts is the first English language text to provide a comprehensive analysis of the challenges facing Brazilian education at all levels including issues such as the quality of basic education the establishment of standards for higher education the experiences of technical and vocational schools teacher education regulation and financing of public and private higher education and the growing role of graduate education and research
