Space Text And Gender An Anthropological Study Of The Marakwet Of Kenya:

Space, Text and Gender Henrietta Moore, 1986 Dr Moore analyses the Marakwet through the relationship between organisation of household and gender relations in a changing society **Space, Text, and Gender** Henrietta L. Moore, 1995-12-29 This groundbreaking anthropological study strikingly illustrates how we can use different interpretations of place to learn more about a society and demonstrates the value of a feminist approach to the analysis of changing systems of representation Henrietta Moore focuses on the relationship between the organization of household space and gender relations showing how that relation shifts due to changing social and economic conditions including such factors as wage labor and education This updated edition contains a new foreword and afterword in which Moore relates her work to more recent developments around gender resistance difference and spatiality *Space, Text, and Gender* Henrietta L. Moore, 1996 This is an anthropological study of the Marakwet people of Kenya focusing on how relationships between the organization of household space and gender relations shift due to changing social and economic conditions

Anthropology and Archaeology Chris Gosden, 2002-01-04 Anthropology and Archaeology provides a valuable and much needed introduction to the theories and methods of these two inter related subjects This volume covers the historical relationship and contemporary interests of archaeology and anthropology It takes a broad historical approach setting the early history of the disciplines with the colonial period during which the Europeans encountered and attempted to make sense of many other peoples It shows how the subjects are linked through their interest in kinship economics and symbolism and discusses what each contribute to debates about gender material culture and globalism in the post colonial world

Journal of Soviet and Post-Soviet Politics and Society Julie Fedor, Samuel Greene, Andre Härtel, Andrey Makarychev, Andreas Umland, 2016-05-03 This special issue focuses on protest movements operating outside of the mainstream in patriarchal and authoritarian societies Themes covered include the place of feminist and gender equality movements in democratically restricted environments intersections between feminism and nationalism the possibilities of right wing feminism and pop feminism the role of gender in high politics and the relationship between nationality and sexuality in the context of protest movements The journal features contributions by scholars human rights and gender equality activists and journalists and facilitates wide ranging discussion of recent and ongoing protest movements in Belarus Russia and Ukraine **The Good Women of the Parish** Katherine L. French, 2013-02-12 There was immense social and economic upheaval between the Black Death and the English Reformation and contemporary writers often blamed this upheaval on immorality singling out women's behavior for particular censure Late medieval moral treatises and sermons increasingly connected good behavior for women with Christianity and their failure to conform to sin Katherine L French argues however that medieval laywomen both coped with the chaotic changes following the plague and justified their own changing behavior by participating in local religion Through active engagement in the parish church the basic unit of public

worship women promoted and validated their own interests and responsibilities Scholarship on medieval women's religious experiences has focused primarily on elite women nuns and mystics who either were literate enough to leave written records of their religious ideas and behavior or had access to literate men who did this for them Most women however were not literate were not members of religious orders and did not have private confessors As *The Good Women of the Parish* shows the great majority of women practiced their religion in a parish church By looking at women's contributions to parish maintenance the ways they shaped the liturgy and church seating arrangements and their increasing opportunities for collective action in all women's groups the book argues that gendered behavior was central to parish life and that women's parish activities gave them increasing visibility and even on occasion authority In the face of demands for silence modesty and passivity women of every social status used religious practices as an important source of self expression creativity and agency

Women and the Environment Irwin Altman, Arza Churchman, 2013-06-29 This thirteenth volume in the series addresses an increasingly salient worldwide research design and policy issue women and physical environments We live in an era of worldwide social change Some nation states are fracturing or disintegrating migrations are resulting from political upheavals and economic opportunities some ethnic and national animosities are resurfacing and global and national economic systems are under stress Furthermore the variability of interpersonal and familial forms is increasing and cultural subgroups minorities women the physically challenged gays and lesbians are vigorously demanding their rights in societies and are becoming significant economic and political forces Although these social system changes affect many people their impact on women is especially salient Women are at the center of most forms of family life Whether in traditional or contemporary cultures women's roles in child rearing home management and community relations have and will continue to be central regardless of emerging and changing family structures And because of necessity and opportunity women are increasingly engaged in paid work in and outside the home women in most cultures have historically always worked but often not for pay Their influence in cultures and societies is also mounting in the social political and economic spheres In technological societies women are playing higher level roles though still in small numbers in economic and policy domains This trend is likely to accelerate in the twenty first century

The Subject of Anthropology Henrietta L. Moore, 2013-04-23 In this ambitious new book Henrietta Moore draws on anthropology feminism and psychoanalysis to develop an original and provocative theory of gender and of how we become sexed beings Arguing that the Oedipus complex is no longer the fulcrum of debate between anthropology and psychoanalysis she demonstrates how recent theorizing on subjectivity agency and culture has opened up new possibilities for rethinking the relationship between gender sexuality and symbolism Using detailed ethnographic material from Africa and Melanesia to explore the strengths and weaknesses of a range of theories in anthropology feminism and psychoanalysis Moore advocates an ethics of engagement based on a detailed understanding of the differences and similarities in the ways in which local communities and western scholars have imaginatively deployed the power of sexual difference She demonstrates the importance of ethnographic listening of focused attention to people's imaginations and of how this illuminates different facets of complex theoretical issues and human conundrums Written not just for professional scholars and for students but for anyone with a serious interest in how gender and sexuality are conceptualized and experienced this book is the most powerful and persuasive assessment to date of what anthropology has to contribute to these debates now and in the future
