Space to Grow Matthew Weinzierl, Brendan Rosseau, 2025-02-25 Your guide using the compelling stories of changemakers and the tools of economics to the transformation and future possibilities of the business and economics of space Space is a place of unparalleled possibility for humanity and it's undergoing a revolution A wave of companies led by gutsy entrepreneurs is unlocking opportunities that fire the imagination and open up new business models No it's not hotels on Mars or day trips to orbit yet but it's an awe inspiring transformation driven by innovative technologies creative approaches hard work and for the first time market forces Above all this revolution is uncovering the simple but unfamiliar truth that space is a place a place where countries markets and each of us can play a vital role in realizing some of our biggest boldest dreams But we won't succeed through dreams alone The space economy is just that an economy governed by the same laws of supply and demand that apply here on Earth The authors who teach a highly popular course on the topic at Harvard Business School bring the revolution in space to life through players you know like SpaceX and Blue Origin and many you may not like Astroscale founded by a Japanese IT executive who quit his job to start a company to clean up space debris They also bring to bear fundamental tools from economics to understand how the market in space is forming how it's fast becoming a source of value for businesses across industries and for society as a whole and how we can best ensure that its growth benefits us all With clarity and rigor Weinzierl and Rosseau get past the breathless hype to

explain what's real, what's not, what comes next and how you can be part of it

The Epic Structure of Space 1999 John K. Balor, 2018-02-18 This book contains transcripts from Online Alpha discussions where the epic and narrative structure of SPACE 1999 is being discussed by comparing episodes with themes, characters and elements of plot from the Homeric Odyssey and Lewis Carroll's stories about Alice. The discussion is motivated by questions raised in the scholarly literature and earlier Online Alpha debates about how to make sense of SPACE 1999 from the viewpoint of critical theory. The book has been developed on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com

The Space of the World Nick Couldry, 2024-09-17 Over the past thirty years, humanity has made a huge mistake. We handed over to big tech decisions that have allowed them to build what has become our space of the world: the highly artificial space of social media platforms where much of our social life now unfolds. This has proved reckless and has huge social consequences. The toxic effects on social life, young people's mental health and political solidarity are well known, but the key factor underlying all this has been missed: the fact that humanity allowed business to construct our space of the world at all and then exploit it for profit. In the process, we ignored two millennia of political thought about the conditions under which a healthy or even a non-violent politics is possible. We endangered the one resource that is in desperately short supply in the face of catastrophic climate change: solidarity. Is human solidarity possible in a world of continuous digital connection and commercially managed platforms, and what if it isn't? In the first book of his trilogy *Humanising the Future*, Nick Couldry offers a radical new vision of how to design our digital spaces so that they build rather than erode both solidarity and community. This trenchant and vividly written book stresses that we cannot afford not to care for our space of the world. We need to rebuild it together.

Space, Mobility, and Crisis in Mega-Event Organisation Rodanthe Tzanelli, 2022-11-25 This book advances an alternative critical posthumanist approach to mega-event organisation, taking into account both the new and the old crises which humanity and our planet face. Taking the delayed Tokyo 2020 Olympic Games as a case study, Tzanelli explores mega-event crisis and risk management in the era of extreme urbanisation, natural disasters, global pandemic and technoscientific control. Using the atmospheric term 'irradiation' as a technology of glamour and transparency, as well as bodily penetration by harmful agents, the book explores this epistemological statement diachronically via Tokyo's relationship with Western forms of domination and synchronically the city as a global cultural-political player but victim of climate catastrophes. It presents how the Olympic enterprise's flattening of indigenous environmental place-making rhythms and the scientisation of space and place in the Anthropocene lead to reductionisms harmful for a viable programme of planetary recovery. An experimental study of the mega-event is enacted which considers the researcher's analytical tools and the styles of human and non-human mobility during the mega-event as reflexive gateways to forms of posthuman flourishing. Crossing and bridging disciplinary boundaries, the book will appeal to any scholar interested in mobilities theory, event and environment studies, sociology of knowledge and cultural globalisation.

Space Oddities Joe Cuhaj, 2022-08-15 Nothing captivates the human imagination like the vast unknowns of space Ancient petroglyphs present renderings of the heavens proof that we have been gazing up at the stars with wonder for thousands of years Since then mankind has systematically expanded our cosmic possibilities What were once flights of fancy and dreams of science fiction writers have become nearly routine a continuous human presence orbiting the Earth probes flying beyond our solar system and men walking on the moon NASA and the Russian space program make traveling to the stars look easy but it has been far from that Space travel is a sometimes heroic sometimes humorous and always dangerous journey fraught with perils around every corner that most of us have never heard of or have long since forgotten Space Oddities brings these unknown offbeat and obscure stories of space to life From the showmanship and bravado of the earliest known space fatality German Max Valier to the first ever indictment under the Espionage Act on an Army officer who leaked secrets concerning the development of early U S rockets and the story of a single loose bolt that defeated the Soviet Union s attempt to beat America to the moon Author Joe Cuhaj also sheds light on the human aspects of space travel that have remained industry secrets until now how the tradition of using a musical playlist to wake astronauts up began fascinating tales about inventions like the Fischer Space Pen Omega watches and even Tang breakfast drink In addition to fun and entertaining space trivia Space Oddities also features stories of the profound impact that space travel has had on challenges right here at home like the effort by civil rights leaders and activists in the 1960s to bring the money from the space program back home to those in need on Earth NASA s FLATs First Lady Astronaut Training program and the 13 women who were selected to become astronauts in 1960 but were denied a chance at flying even after successfully completing the rigorous astronaut training program and the animals who many times sacrificed their lives to prove that man could fly in space Filled with rare and little known stories Space Oddities will bring the final frontier to the homes of diehard space readers and armchair astronauts alike
