Spaceage Science And Stoneage Politics:

Space-Age Science and Stone-Age Politics John Scales Avery, 2016-02-07 Space age science and stone age politics make an extraordinarily dangerous mixture It seems probable that in the future the rapidity of scientific and technological change will produce ethical dilemmas and social tensions even more acute than those we experience today It is likely that the fate of our species and the fate of the biosphere will be made precarious by the astonishing speed of scientific and technological change unless this progress is matched by the achievement of far greater ethical and political maturity than we have yet attained

Networked Governance and Transatlantic Relations Gabriella Paar-Jakli, 2014-04-29 In today's complex and interconnected world scholars of international relations seek to better understand challenges spurred by intensified global communication and interaction The complex connectedness of modern society and politics compels us to investigate the pattern of interconnections among actors who inhabit social and political spaces Gabriella Paar-Jakli's study aims to advance theory and practice by examining the networks used by specialists in North America and Europe to achieve their policy goals in the area of science and technology Her book suggests that to overcome policy problems transnationally three critical factors should be considered First as science and technology policy becomes increasingly critical to resolving global issues it should be regarded as an integral element of the foreign policy process Second as liberal international relations theory argues the increasing role of NGOs must be taken seriously alongside states as vital agents of policy reform Third as transatlantic relations remain center to maintaining the global order they must be reconsidered Paar-Jakli assesses the role of digital networks as facilitators of regional cooperation Utilizing various techniques of social network analysis her research indicates an active and structurally discernible network in cyberspace among transatlantic organizations and demonstrates the role of virtual networks as facilitators of cooperative arrangements in transatlantic relations Paar-Jakli's original research uses social network analysis to investigate transatlantic cooperation a new approach that will be noteworthy to network and transatlantic scholars as well as policymakers

Science And Society John Scales Avery, 2016-09-14 The latest advances and discoveries in science have made and continue to make a huge impact on our lives This book is a history of the social impact of science and technology from the beginnings of civilization up to the present The book explains how the key inventions agriculture writing and printing with movable type initiated an explosive growth of knowledge and human power over the environment It also shows how the Industrial Revolution changed the relationship between humans and nature and initiated a massive use of fossil fuels Problems related to nuclear power nuclear weapons genetic engineering information technology exhaustion of non renewable resources use of fossil fuels and climate change are examined in the later chapters of the book Finally the need for ethical maturity to match our scientific progress is discussed

Transforming Our World Ivo Šlaus, 2020-05-15 This book addresses the survival of humankind Our world is the best it has ever been but it is not sustainable It is self destructive it is marked by war which can destroy the world in a single day the destruction of natural

and human capital within 10 years and technologies which could be both beneficial and destructive We have no future if we continue living as we do currently and even if we do nothing This book highlights the kinds of changes which are required Wars are not biologically necessary and are useless the culture that established wars can eliminate them Poverty hunger and inequality destroy human capital These destructions can be overcome by changing economic and political paradigms and our mindset Empathy freedom curiosity and wisdom are required Learners in a Changing Learning Landscape Jan

Visser, Muriel Visser-Valfrey, 2008-06-01 most studies aimed at improving learning focus on the instructor and the parameters of the learning environment rather than the learner On the other hand it was felt that ibstpi's interest was too focused on the online learner and that broader questions needed to be asked placing the learner in the context of a hugely complex learning landscape that is only partially determined by the formal education context and deliberate processes of learning Based on the above consideration and while inspired by ibstpi's initiative the Learning Development Institute proposed to run a dedicated workshop in conjunction with a Presidential Panel Session to be hosted by the Association for Educational Communications and Technology AECT at its annual convention in October 2005 in Orlando Florida This brought together ten individuals who initially started collaborating online The majority of them then met face to face in Orlando at the workshop They subsequently shared their ideas with the wider audience of attendees at the Presidential Panel Session that followed the next day And they then took another two years to reflect further on the issues that had emerged producing the chapters of this book

The Need for a New Economic System John Scales Avery, 2016-02-07 It is clear that our present economic system is unsustainable Never ending exponential industrial growth on a finite planet is a logical absurdity We are already using resources at a rate which it would take 1.6 planet earths to replace We are already undermining the ecological systems which support all of life Our present economic system has led to an unbelievable degree of economic inequality To maintain this inequality both between nations and within nations military force is used and democracy is replaced by oligarchy The future of human civilization is endangered both by the threat of thermonuclear war and by the threat of catastrophic climate change and both of the twin threats are results of our present economic system This book documents in detail the serious economic problems of today's world and it also proposes sustainable solutions **Civilization's Crisis: A Set Of Linked**

Challenges John Scales Avery, 2017-04-20 Modern civilization faces a broad spectrum of daunting problems but rational solutions are available for them all This book explores the following issues 1 Threats to the environment and climate change 2 a growing population and vanishing resources 3 the global food and refugee crisis 4 intolerable economic inequality 5 the threat of nuclear war 6 the military industrial complex and 7 limits to growth These problems are closely interlinked and their possible solutions are discussed in this book

Collected Essays 3 John Scales Avery,2015-11-22 This book contains a collection of essays and articles by John Scales Avery discussing the severe problems and challenges which the world faces during the 21st century Human civilization and the biosphere are threatened by catastrophic climate change Unless rapid steps are taken to replace fossil fuels by 100% renewable energy we risk passing a tipping point beyond which uncontrollable feedback loops could produce a 6th extinction event comparable to those observed in the geological record Another serious threat to human civilization and the biosphere is the danger of a catastrophic thermonuclear war Over a long period of time there is an ever increasing risk that such a war will occur by accident or miscalculation Thirdly there is threat of an extremely serious and widespread famine produced by the climate change rapidly growing populations and the end of the fossil fuel era We must urgently address all three challenges
