Spaces Dimensions Of The Human Landscape:

Spaces Barrie B. Greenbie, 1981 Studies the design of various cities around the world its effect on the inhabitants and how cities environments can be improved

Human Dimension and Interior Space Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics Its applicability to the design process is seen in the physical fit or interface between the human body and the various components of interior space Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors including interior designers architects furniture designers builders industrial designers and students of design The use of anthropometric data although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process This comprehensive overview of anthropometrics consists of three parts The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established The second part contains easy to read illustrated anthropometric tables which provide the most current data available on human body size organized by age and percentile groupings Also included is data relative to the range of joint motion and body sizes of children The third part contains hundreds of dimensioned drawings illustrating in plan and section the proper anthropometrically based relationship between user and space The types of spaces range from residential and commercial to recreational and institutional and all dimensions include metric conversions In the Epilogue the authors challenge the interior design profession the building industry and the furniture manufacturer to seriously explore the problem of adjustability in design They expose the fallacy of designing to accommodate the so called average man who in fact does not exist Using government data including studies prepared by Dr Howard Stoudt Dr Albert Damon and Dr Ross McFarland formerly of the Harvard School of Public Health and Jean Roberts of the U S Public Health Service Panero and Zelnik have devised a system of interior design reference standards easily understood through a series of charts and situation drawings With Human Dimension and Interior Space these standards are now accessible to all designers of interior environments

Space and Social Theory Andrzej J L Zieleniec, 2007-10-29 The importance of the spatial dimension of the structure organization and experience of social relations is fundamental for sociological analysis and understanding Space and Social Theory is an essential primer on the theories of space and inherent spatiality guiding readers through the contributions of key and influential theorists Marx Simmel Lefebvre Harvey and Foucault Giving an essential and accessible

overview of social theories of space this books shows why it matters to understand these theorists spatially It will be of interest to upper level students and researchers of social theory urban sociology urban studies human geography and urban politics

The Urban Design Reader Michael Larice,Elizabeth Macdonald,2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

People and Space Giovanni Maciocco,Silvano Tagliagambe,2009-04-05 This book explores new forms and modalities of relations between people and space that increasingly affect the life of the city The investigation takes as its starting point the idea that in contemporary societies the loss of our relationship with place is a symptom of a breakdown in the relationship between ethics and aesthetics This in turn has caused a crisis not only in taste but also in our sense of beauty our aesthetic instinct and our moral values It has also led to the loss of our engagement with the landscape which is essential for cities to function The authors argue that new fertile

forms of interaction between people and space are now happening in what they call the intermediate space at the border of urban normality and those parts of a city where citizens experiment with unconventional social practices This new interaction engenders a collective conscience giving a new and productive vigor to the actions of individuals and also their relations with their environment These new relations emerge only after we abandon what is called the therapeutic illusion of space which still exists today and which binds in a deterministic manner the quality of civitas the associative life of people in the city to the quality of urban space Projects for the city should instead have as their keystone the notion of social action as a return to a critical perspective to a courageous acceptance of social responsibility at the same time as seeking the generative structures of urban life in which civitas and urbs again acknowledge each other Experiential Landscape Kevin

Thwaites, Ian Simkins, 2006-12-05 Incorporating a review of key philosophical and theoretical themes and offering a socially responsive design vocabulary Kevin Thwaites and Ian M Simkins provide the reader with a greater understanding of the human environment relationship **A History of Domestic Space** Peter Ward, 2007-11-01 This is a history of domestic space in Canada Peter Ward looks at how spaces in the Canadian home have changed over the last three centuries and how family and social relationships have shaped and been shaped by these changing spaces A fundamental element of daily life for individuals and families is domestic privacy that of individuals and that of the family or household There are also two facets of privacy privacy from and privacy to Personal privacy sets the individual apart from the group creating opportunities for seclusion Family privacy draws boundaries between the household and the community defending the solidarity of the home and providing a basis for family relationships In both ways privacy is intimately involved with the history of the house Over time the changing size shape and location of the home have created widely different opportunities for family and personal privacy Together with major shifts in household composition family size and domestic technology they have gradually altered the conditions of everyday domestic life But the pattern of change has been far from uniform for the nature meaning and experience of privacy in Canadian have varied widely over the past 300 years This book explores some of those experiences and meanings reflecting on their implications for family and social life historically as well as in the recent past

Loose Space Karen Franck, Quentin Stevens, 2006-10-16 In cities around the world people use a variety of public spaces to relax to protest to buy and sell to experiment and to celebrate Loose Space explores the many ways that urban residents with creativity and determination appropriate public space to meet their own needs and desires Familiar or unexpected spontaneous or planned momentary or long lasting the activities that make urban space loose continue to give cities life and vitality The book examines physical spaces and how people use them Contributors discuss a wide range of recreational commercial and political activities some are conventional others are more experimental Some of the activities occur alongside the intended uses of planned public spaces such as sidewalks and plazas other activities replace former uses as in abandoned warehouses and industrial sites The thirteen case studies international in scope demonstrate the continuing

richness of urban public life that is created and sustained by urbanites themselves Presents a fresh way of looking at urban public space focusing on its positive uses and aspects Comprises 13 detailed well illustrated case studies based on sustained observation and research by social scientists architects and urban designers Looks at a range of activities both everyday occurrences and more unusual uses in a variety of public spaces planned leftover and abandoned Explores the spatial and the behavioral considers the wider historical and social context Addresses issues of urban research architecture urban design and planning Takes a broad international perspective with cases from New York London Berlin Amsterdam Rome Guadalajara Athens Tel Aviv Melbourne Bangkok Kandy Buffalo and the North of England *Rural by Design* Randall Arendt, 2017-11-08 For America's rural and suburban areas new challenges demand new solutions Author Randall Arendt meets them in an entirely new edition of *Rural by Design* When this planning classic first appeared 20 years ago it showed how creative practical land use planning can preserve open space and keep community character intact The second edition shifts the focus toward infilling neighborhoods strengthening town centers and moving development closer to schools shops and jobs New chapters cover form based codes visioning sustainability low impact development green infrastructure and more while 70 case studies show how these ideas play out in the real world Readers rural or not will find practical advice about planning for the way we live now
