Spanish Approaches To The Island Of Cali:

Spanish Approaches to the Island of California, 1628-1632 W. Michael Mathes, 1975 The Island of California Dora Polk, 1995 Originally published Spokane Wash Arthur H Clark Co 1991 in series Spain in the West **Explorers of the Maritime Pacific Northwest** William L. Lang Ph.D., James V. Walker, 2016-05-09 Covering the adventures of coastal and ocean explorers who made key discoveries and landmark observations from northern California up the coastline to Alaska during the mid 1700s to the early 1800s this anthology of primary source journal entries book excerpts maps and drawings enables readers to discover the Northwest Coast for themselves More than 200 years ago explorers traveled from Central America Russia and even Europe to explore the coastline of the American Pacific Northwest with goals of developing new trade routes claiming territory for their home countries expanding their fur trade or exploring in the name of scientific discovery This book will take readers to the decks of the great ships and along for the adventures of legendary explorers such as James Cook Alejandro Malaspina and George Vancouver This book collects primary source materials such as journal entries book excerpts maps and drawings that document how explorers first experienced the unknown Pacific Northwest coast as seen through the eyes of non native people Readers will learn how explorers such as Vitus Bering and Robert Gray used the full extent of their powers of observation to record the landscape animals and plants they witnessed as well as their interactions with indigenous peoples during their search for the mythic Northwest Passage The book also explains how the maritime explorers of this period mapped the remote regions of the Northwest Coast working without the benefit of modern technology and relying instead on their knowledge of a range of sciences mathematics and seamanship in addition to their ability to endure harsh and dangerous conditions to produce exceptionally detailed maps *The Mapping of the Entradas Into the Greater Southwest* Dennis Reinhartz, Gerald D. Saxon, 1998 In this groundbreaking and lavishly illustrated volume edited by Dennis Reinhartz and Gerald D Saxon five leading scholars in history geography and cartography discuss the role Spanish explorers and mapmakers played in bringing knowledge of the New World to Europe The entradas of P nfilo de Narvez and Alvar N nez Cabeza de Vaca 1527 37 Fray Marcos de Niza and Francisco V squez de Coronado 1539 42 and Hernando de Soto and Luis de Moscoso 1539 43 into the Greater Southwest of North America were crucial in the dissemination of information and images of the newly discovered lands The contributors investigate linkages between the early explorers experiences their influence on indigenous peoples and perceptions of the region as reflected in printed maps of the period This body of images which incorporated Indian information made a powerful impression on the still largely preliterate people of Europe reshaping their world **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1978 Traders and Raiders Natale A. Zappia, 2014 Traders and Raiders The Indigenous World of the Colorado Basin 1540 1859 **Mapping and Empire** Dennis Reinhartz, Gerald D. Saxon, 2010-01-01 From the sixteenth through the mid nineteenth centuries Spain then Mexico and finally the United States took ownership of the land from the Gulf Coast of Texas

and Mexico to the Pacific Coast of Alta and Baja California today's American Southwest. Each country faced the challenge of holding on to territory that was poorly known and sparsely settled and each responded by sending out military mapping expeditions to set boundaries and chart topographical features. All three countries recognized that turning terra incognita into clearly delineated political units was a key step in empire building as vital to their national interest as the activities of the missionaries, civilian officials, settlers, and adventurers who followed in the footsteps of the soldier engineers. With essays by eight leading historians, this book offers the most current and comprehensive overview of the processes by which Spanish, Mexican, and U.S. soldier engineers mapped the southwestern frontier as well as the local and even geopolitical consequences of their mapping. Three essays focus on Spanish efforts to map the Gulf and Pacific Coasts to chart the inland Southwest and to define and defend its boundaries against English, French, Russian, and American incursions. Subsequent essays investigate the role that mapping played both in Mexico's attempts to maintain control of its northern territory and in the United States' push to expand its political boundary to the Pacific Ocean. The concluding essay draws connections between mapping in the Southwest and the geopolitical history of the Americas and Europe.
