Rethinking Reference for Academic Libraries Carrie Forbes,Jennifer Bowers,2014-12-05 The rapid development of the Web and Web based technologies has led to an ongoing redefinition of reference services in academic libraries A growing diversity of users and the need and possibility for collaboration in delivering reference services bring additional pressures for change At the same time there are growing demands for libraries to show accountability and service value All of these trends have impacted the field and will continue to shape reference and research services And they have led to a need for increasingly specialized professional competencies and a literature to support them In order to reimagine reference service for twenty first century learning environments practitioners will need to understand several focal areas of emerging reference In particular collaboration with campus partners diverse student populations technological innovations the need for assessment and new professional competencies present new challenges and opportunities for creating a twenty first century learning environment Librarians must not only understand but also embrace these emerging reference practices This edited volume containing five sections and fourteen chapters reviews the current state of reference services in academic libraries with an emphasis on innovative developments and future trends The main theme that runs through the book is the urgent need for inventive imaginative and responsive reference and research services Through literature reviews and case studies this book provides professionals with a convenient compilation of timely issues and models at comparable institutions As academic libraries shift from functioning primarily as collections repositories to serving as key players in discovery and knowledge creation value added services such as reference are even more central to libraries and universities changing missions Catalogue of the Reference Library Paisley Free Public Library and Museum. Smith,Daniel Alejandro González,2015-11-25 While there are volumes that fall into the category of children s literature there appears to be relatively few that explore the needs of bilingual learners and the linguistic and sociocultural context of Latino children s literature This volume makes a needed contribution by addressing the social cultural academic and linguistic needs of Latino bilingual learners who are still underserved through current school practices We aim to conceptualize different forms of social knowledge so that they can serve as cultural resources for learning acquiring knowledge and transforming self and identity This volume presents a balance of theory research and practice that speak to authentic multicultural Latino literature and helps ensure its availability for all students The intended outcome of this volume then is to create a heightened awareness of the cultural and linguistic capital held by the Latino community to increase Latino students social capital
