Nestwork Jennifer Clary-Lemon,2023-08-16 As more and more species fall under the threat of extinction humans are not only taking action to protect critical habitats but are also engaging more directly with species to help mitigate their decline Through innovative infrastructure design and by changing how we live humans are becoming more attuned to nonhuman animals and are making efforts to live alongside them Examining sites of loss temporal orientations and infrastructural mitigations Nestwork blends rhetorical and posthuman sensibilities in service of the ecological care In this innovative ethnographic study rhetorician Jennifer Clary Lemon examines human nonhuman animal interactions identifying forms of communication between species and within their material world Looking in particular at nonhuman species that depend on human development for their habitat Clary Lemon examines the cases of the barn swallow chimney swift and bobolink She

studies their habitats along with the unique mitigation efforts taken by humans to maintain those habitats including building barn swallow gazebos and artificial chimneys and altering farming practices to allow for nesting and breeding What she reveals are fascinating forms of rhetoric not expressed through language but circulating between species and materials objects Nestwork explores what are in essence nonlinguistic and decidedly nonhuman arguments within these local environments Drawing on new materialist and Indigenous ontologies the book helps attune our senses to the tragedy of species decline and to a new understanding of home and homemaking Brain-Inspired Computing Katrin Amunts, Lucio Grandinetti, Thomas Lippert, Nicolai Petkov, 2021-07-20 This open access book constitutes revised selected papers from the 4th International Workshop on Brain Inspired Computing BrainComp 2019 held in Cetraro Italy in July 2019 The 11 papers presented in this volume were carefully reviewed and selected for inclusion in this book They deal with research on brain atlas multi scale models and simulation HPC and data infra structures for neuroscience as well as artificial and natural neural architectures The Comparative Oologist and Journal of the International Museum of Comparative Oology, 1924

Cowbirds and Other Brood Parasites Catherine P. Ortega, 1998-09 The Brown headed Cowbird is known to use the nests of more than 200 other bird species and cowbirds in general are believed to play a role in the decline of some migratory songbird populations These brood parasites birds that lay their eggs in the nests of others have long flourished in North America In this timely book Catherine Ortega summarizes and synthesizes a wealth of information on cowbirds from around the world that has appeared since the publication of Herbert Friedmann's classic 1929 monograph on these birds Most of this information has appeared in the last quarter century and reflects advances in our understanding of how brood parasitism influences and is influenced by host species Ortega shows that in order to manage cowbirds without further damaging delicate balances in host parasite relationships it is necessary to understand such factors as behavior reproduction population dynamics and response to landscape patterns She examines and explains the origin evolution and costs of brood parasitism and she discusses the philosophical and ecological considerations regarding the management of cowbirds a controversial issue because of their perceived influence on threatened and endangered birds Because brood parasitism has evolved independently in various bird families information on this adaptive strategy is of great ecological interest and considerable value to wildlife management Cowbirds and Other Brood Parasites is an important reference on these creatures that enhances our understanding of both their behavior and their part in the natural world **The Gardeners' Chronicle**, 1879 **Young Oologist**, 1895 **Gardeners' Chronicle**, 1907 Gardeners' Chronicle and Agricultural Gazette, 1844
