The Mathematical Theory of Airborne Fire Control Naval Avionics Facility (U.S.),Kaj L. Nielsen,James Francis Heyda,1951 *Design for Control of Projectile Flight Characteristics* United States. Army Materiel Command,1966 This handbook presents a general survey of the principal factors affecting the flight of projectiles and describes the methods commonly used for predicting and influencing the flight performance The coefficients which characterize the aerodynamic forces and moments of a moving body are identified methods for determining the coefficients applicable to a projectile having a given shape and center of gravity location are described and the coefficients of a number of projectiles and projectile shapes are given The use of aerodynamic coefficients in predicting stability range and accuracy is described The effects of variations in projectile shape and center of gravity location on range accuracy and lethality are discussed Some material on prototype testing and the effects of round to round variations in production lots is presented *American Amphibious Gunboats in World War II* Robin L. Rielly,2013-05-13 As the United States began its campaign against numerous Japanese held islands in the Pacific Japanese tactics required them to develop new weapons and strategies One of the most crucial to the island assaults was a new group of amphibious gunboats that could deliver heavy fire close in to shore as American forces landed These gunboats were also to prove important in the interdiction of inter island barge traffic and late in the war the kamikaze threat Several variations of these gunboats were developed based on the troop carrying LCI L They included three conversions of the LCI L with various combinations of guns rockets and mortars and a fourth gunboat the LCS L based on the same hull but designed as a weapons platform from the beginning By the end of the war the amphibious gunboats had proven their worth *Make: Maverick Scientist* Forrest M. Mims,2024-02-14 *Maverick Scientist* is the memoir of Forrest Mims who forged a distinguished scientific career despite having no academic training in science Named one of the 50 Best Brains in Science by Discover magazine Forrest shares what sparked his childhood curiosity and relates a lifetime of improbable dramatic and occasionally outright dangerous experiences in the world of science At thirteen he invented a new method of rocket control At seventeen he designed and built an analog computer that could translate Russian into English and that the Smithsonian collected as an example of an early hobby computer While majoring in government at Texas A M University Forrest created a hand held radar like device to help guide the blind And during his military service he had to be given special clearance to do top secret laser research at the Air Force Weapons Lab Why Because while he lacked the required engineering degree they wanted his outside the box thinking on the project He went on to co found MITS Inc producer of the first commercially successful personal computer wrote a series of electronics books for Radio Shack that sold more than seven million copies and designed the music synthesizer circuit that became known as the infamous Atari Punk Console All this came before he started consulting for NASA s Goddard Space Flight Center and NOAA s famous Mauna Loa Observatory and earning the prestigious Rolex Award This intimate portrait of a self made scientist shares a revelatory look inside the

scientific community and tells the story of a lifelong learner who stood by his convictions even when pressured by the establishment to get in line with conventional wisdom With dozens of personal photos and illustrations Maverick Scientist serves as proof that to be a scientist you simply need to do science **Naval Aviation News** ,1953 Dictionary of the Modern United States Military S.F.
