Robert Grosseteste and the pursuit of Religious and Scientific Learning in the Middle Ages Jack P. Cunningham, Mark Hocknull, 2016-08-29 This book explores a wide range of topics relating to scientific and religious learning in the work of Bishop Robert Grosseteste c 1168 1253 and does so from various perspectives including those of a twenty first century scientists historians and philosophers as well as several medievalists In particular it aims to contribute to our understanding of where to place Grosseteste in the history of science against the background of the famous claim by A C Crombie that Grosseteste introduced what we now might call experimental science and to demonstrate that the polymathic world of the medieval scholar who recognized no dichotomy in the pursuit of scientific and philosophical theological understanding has much to teach those of us in the modern world who wrestle with the vexed question of the relationship between science and religion The book comprises an edited selection of the best papers presented at the 3rd International Robert Grosseteste Conference 2014 on the theme of scientific and religious learning especially in the work of Grosseteste

From Modes to Keys in Early Modern Music Theory Michael R. Dodds, 2024 From Modes to Keys in Early Modern Music Theory addresses one of the broadest and most elusive open topics in music history the transition from the Renaissance modes to the major and minor keys of the high Baroque Through deep engagement with the corpus of Western music theory author Michael R Dodds presents a model to clarify the factors of this complex shift

Listen to This Alex Ross, 2025-09-23 One of The Telegraph's Best Music Books 2011 Alex Ross's award winning international bestseller *The Rest Is Noise* Listening to the Twentieth Century has become a contemporary classic establishing Ross as one of our most popular and acclaimed cultural historians Listen to This which takes its title from a beloved 2004 essay in which Ross describes his late blooming discovery of pop music showcases the best of his writing from more than a decade at The New Yorker These pieces dedicated to classical and popular artists alike are at

once erudite and lively In a previously unpublished essay Ross brilliantly retells hundreds of years of music history from Renaissance dances to Led Zeppelin through a few iconic bass lines of celebration and lament He vibrantly sketches canonical composers such as Schubert Verdi and Brahms gives us in depth interviews with modern pop masters such as Bjrk and Radiohead and introduces us to music students at a Newark high school and indie rock hipsters in Beijing Whether his subject is Mozart or Bob Dylan Ross shows how music expresses the full complexity of the human condition Witty passionate and brimming with insight Listen to This teaches us how to listen more closely

The 1933 Chicago World's Fair Cheryl R. Ganz, 2008-09-24 Chicago's 1933 world's fair set a new direction for international expositions Earlier fairs had exhibited technological advances but Chicago's fair organizers used the very idea of progress to buoy national optimism during the Depression's darkest years Orchestrated by business leaders and engineers almost all former military men the fair reflected a business military engineering model that envisioned a promising future through science and technology's application to everyday life Fair organizers together with corporate leaders believed that progress rides on the tide of technological innovation and consumerism But not all those who struggled for a voice at Chicago's 1933 exposition had abandoned the traditional notions of progress that entailed social justice and equality recognition of ethnic and gender related accomplishments and personal freedom and expression The stark pronouncement of the fair's motto Science Finds Industry Applies Man Conforms was challenged by iconoclasts such as Sally Rand whose provocative fan dance became a persistent symbol of the fair as well as a handful of others including African Americans ethnic populations and foreign nationals groups of working women and even well heeled socialites They all met obstacles but ultimately introduced personal social definitions of progress and thereby influenced the ways the fair took shape In this engaging social and cultural history Cheryl R Ganz examines Chicago's second world's fair through the lenses of technology ethnicity and gender The book also features eighty six photographs nearly half of which are full color of key locations exhibits and people as well as authentic ticket stubs postcards pamphlets posters and other items From fan dancers to fan belts The 1933 Chicago World's Fair A Century of Progress offers the compelling untold stories of fair planners and participants who showcased education industry and entertainment to sell optimism during the depths of the Great Depression

Gurdjieff, String Theory, Music Mitzi DeWhitt, 2006-02-08 As the third in a musicological trilogy that seeks objective answers to physical and metaphysical questions by way of musical ratios and proportions this book may start with the acoustical properties of vibrating strings but it certainly does not stop there Rather it goes on to attack some of the thorniest issues facing quantum physics today including why string theory as it is presently conceived doesn't work what is missing in the physicists understanding of missing information and how the real cause underlying the perceived inflation of the universe is in fact due to the power laws inherent in vibrating strings The surprising answers are neither wholly mathematical nor totally philosophical but result from the reconciling perspective of music theory the real M theory Moving beyond the sterile and secular world view of the physicists the author introduces into the equation the sacred metaphysical soul principle now viewed as the holographic membrane whose sole function is to gather and store information and thus serve as the anti entropic force within the universe The properties of the soul being movement and expansion have long been associated with the figure called the lambdoma and with the ancient diatonic scale that naturally forms within it known as The Scale of the Soul of the World and Nature With uncanny insight the author shows how there is not one but three musical scales diatonic chromatic and enharmonic which form of their own accord within the expanding lambdoma These informing musical scales become the obvious links to the three branes of the quantum physicists at the same time providing substantive evidence for why a three brain system is absolutely essential for the completion of the soul of man an idea that students of the Gurdjieff Work will find very familiar and perhaps very intriguing

Shades of Grey Jasper Fforde, 2009-12-29 From the New York Times bestselling author of the Thursday Next series comes a laugh out loud funny Los Angeles Times and brilliantly original Booklist starred review novel of a man attempting to navigate a color coded world A rich brew of dystopic fantasy and

deadpan goofiness The Washington Post Welcome to Chromatacia where the Colortocracy rules society through a social hierarchy based on one's limited color perception In this world you are what you can see Eddie Russet wants to move up When he and his father relocate to the backwater village of East Carmine his carefully cultivated plans to leverage his better than average red perception and marry into a powerful family are quickly upended Eddie must content with lethal swans sneaky Yellows inviolable rules an enforced marriage to the hideous Violet deMauve and a risky friendship with an intriguing Grey named Jane who shows Eddie that the apparent peace of his world is as much an illusion as color itself Will Eddie be able to tread the fine line between total conformity accepting the path partner and career delineated by his hue and his instinctive curiosity that is bound to get him into trouble *Canons and Canonic Techniques, 14th-16th Centuries* Katelijne Schiltz, Bonnie J. Blackburn, 2007 Although canons pervade music of the Middle Ages and the Renaissance they have not received proportionate attention in the musicological literature The contributions in this book shed light on canons and canonic techniques from a wide range of perspectives such as music theory and analysis compositional and performance practice palaeography and notation as well as listening expectations and strategies Especially in the case of riddle canons insights from other disciplines such as literature theology iconography emblematics and philosophy have proved crucial for a better understanding and interpretation of how such pieces were created The essays extend from the early period of canonic writing to the seventeenth century ending with three contributions concerned with the reception history of medieval and Renaissance canons in music and writings on music from the Age of Enlightenment to the present This book was awarded the Special Citation by the Society for Music Theory in November 2008 **Report of the Federal Security Agency** United States. Office of Education, 1888 **Journal of the Society of Arts** Royal Society of Arts (Great Britain), 1860 **Circular of Information of the Bureau of Education, for ...** United States. Office of Education, 1888 Encyclopedia of Astronomy and Astrophysics Paul Murdin, 2001 Music Equal Temperament Toni Morrow Wyatt, 2012-08-07 This book is about Zhu Zaiyu's Equal Temperament in Music as well as China's scientific and cultural contributions to the art of music

A Kingdom Not of This World Kevin C. Karnes, 2013-07-30 Typically regarded as reflecting on a culture in social political or psychological crisis the arts in fin de siècle Vienna had another side they were means by which creative individuals imagined better futures and perfected worlds dawning with the turn of the twentieth century As author Kevin C. Karnes reveals much of this utopian discourse drew inspiration from the work of Richard Wagner whose writings and music stood for both a deluded past and an ideal future yet to come Illuminating this neglected dimension of Vienna's creative culture this book ranges widely across music philosophy and the visual arts Uncovering artworks long forgotten and providing new perspectives on some of the most celebrated achievements in the Western canon Karnes considers music by Mahler Schoenberg and Alexander Zemlinsky paintings sculptures and graphic art by Klimt Max Klinger and members of the Vienna Secession and philosophical writings by Nietzsche Schopenhauer and Maurice Maeterlinck Through analyses of

artworks and the cultural dynamics that surrounded their creation and reception this study reveals a powerful current of millennial optimism running counter and parallel to the cultural pessimism widely associated with the period It discloses a utopian discourse that is at once beautiful moving and deeply disturbing as visions of perfection gave rise to ecstatic artworks and dystopian social and political realities
