A Spiritual Strategy for Counseling and Psychotherapy P. Scott Richards,2009 The book begins with a review of the history of science and psychology of the central beliefs of the major world religions and of the

evolution of psychotherapy The authors then look at traditional antagonisms between the spiritual and scientific domains and they offer guidelines and a series of case studies that bring their theses and research to life The authors argue that when psychotherapists diagnose and assess their clients they should routinely assess the religious and spiritual system of their clients lives to obtain a fuller and more accurate diagnostic picture This book provides guidance for integrating a theistic spiritual strategy into mainstream approaches to psychology and psychotherapy in order to reach a large underserved population of clients with religious and spiritual beliefs The theistic approach assumes that God exists that human beings have an eternal spirit or soul and that God communicates with human beings through spiritual processes The authors argue that spirituality is also susceptible to scientific investigation They place their proposed theistic strategy on a parallel path with the more traditional forms of psychotherapy that have evolved in the past 100 years PsycINFO Database Record c 2004 APA all rights reserved *Spiritual Care and Therapy* Peter VanKatwyk,2003-09-03 Annotation Peter VanKatwyk explores

Foreword by Brian Thorne Emeritus Professor

Product description

At one level this book is an impassioned plea for the field of counselling and psychotherapy to take more seriously the spiritual dimension of human existence and to put the soul back in psychotherapy. At another level the book constitutes an in depth exploration of a spiritually oriented person centred approach which is based on an integrative therapeutic model called the core self model. The author traces the journey of the self through the stages of life and looks afresh at the process of becoming a person that Carl Rogers first described over fifty years ago. In so doing she draws not only on humanistic person centred theory and practice but also on the truths to be found in the world's major spiritual traditions. Finally on a more practical level she considers what it might mean to be a spiritually oriented person centred therapist and discusses the key principles involved in working effectively with the kind of spiritual issues clients may bring to therapy. She also explores the concept of soul work and considers how this might be incorporated into person centred therapeutic practice.
