engage in fruitful and transforming dialogue with the religious other particularly Muslims This book addresses a the constituents of communal identity and the impact of dialogue on such identity b how the Anglican Roman Catholic dialogue has or has not transformed the communal identities of the dialogue partners particularly in the local context of Nigeria c the ways in which the perceived advantages of a transformative model of dialogue shaped by ecumenical encounter and dialogue can be applied to interreligious encounter and dialogue and d how theological reflection interacts with praxis in promoting transformation through dialogue

New Lenses on Intellectual Disabilities Jennifer Clegg, 2020-05-21 This book gathers together recent international research in intellectual disability ID examining the diverse modes of existence that characterise living with intellectual disabilities in the 21st century Ranging from people with no speech and little mobility who need 24 hour care to people who marry or hold down jobs this book moves beyond the typical person with ID imagined by public policy healthy with mild ID and a supportive family and living in a welcoming community The book is divided into three sections The first A richer picture of people and relationships expands our understanding of different people and lifestyles associated with ID The second section Where current policies fall short finds that Supported Living provides just as mediocre a form of care as group homes and concludes that services for people with challenging behaviour are unrelated to need The contributors research identifies no effective employment support strategies as well as technological and legal changes that prevent organisations from employing people with ID With nearly a quarter of this population in poor health the contributors reflect on whether social model approaches should be allowed to trump medical considerations The third section New thinking about well being reveals that being old poor and living alone increases health risk and that medication administration is significantly more complex for people with ID Moving beyond 20th century certainties surrounding intellectual disability this book will be of interest to those studying contemporary issues facing those living with ID as well as those studying public health policy more widely The chapters in this book were originally published in issues of the Journal of Intellectual Developmental Disability

Nominalism R. T. Johnson Raih,2021-10-06 The spiritual decay of nominalism threatens the established church worldwide While spiritual lethargy is often addressed from the perspective of theology and discipleship little attention has been given to the role of homiletics in revitalizing a congregation s spiritual health In this study Dr Johnson Raih explores the impact of preaching on members of Baptist churches in Imphal Manipur India from 2000 to 2015 He utilizes interviews and

questionnaires from pastors church leaders and lay members to assess the presence of nominalism within church congregations along with the effects of various preaching methods on increasing or decreasing spiritual vitality Combining this qualitative research with scriptural and theological insight Raih suggests that expository preaching has the power to confront and even eradicate nominalism within the church He draws on biblical examples along with the methodology of John Stott and Timothy Keller to offer ten practical recommendations for countering nominalism homiletically whether in Imphal India or around the world
