Katherine Sophie Dreier

The Madonna In Western Painting:

The Madonna in Western Painting Christo Kovachevski, 1991 **Mary in Western Art** Timothy Verdon, Filippo Rossi, 2005 This timely publication ponders the presence of Mary the Mother of Jesus in art and seeks to evoke the affective rationale underlying Mary's centuries-old fascination **Duccio and the Origins of Western Painting** Keith Christiansen, 2008 **The Image of the Black in Western Art** David Bindman, Henry Louis Gates (Jr.), Karen C. C. Dalton, 2010 A pioneering work in the field of art history The Image of the Black in Western Art is a comprehensive series of ten books which offers a lavishly illustrated history of the representations of people of African descent from antiquity to the present Each book includes a series of essays by some of the most distinguished names in art history Ranging from images of Pharaohs created by unknown hands almost 3 500 years ago to the works of the great masters of European and American art such as Bosch Durer Mantegna Rembrandt Rubens Watteau Hogarth Copley and Goya to stunning new media creations by contemporary black artists these books are generously illustrated with beautiful moving and often little known images of black people Black figures queens and slaves saints and soldiers priests and prisoners dancers and athletes children and gods are central to the visual imagination of Western civilization Written in accessible language the extensive and insightful commentaries on the illustrations by distinguished art historians make this series invaluable for the general reader and the specialist alike **The Birth of Western Painting (Routledge Revivals)** Robert Byron, David Talbot Rice, 2013-12-17 First published in 1930 this book deals with Byzantine art not as an isolated province but as one intimately connected with the subsequent history of European painting After a summary of the whole question in its relation to modern art the second chapter opens with a novel analysis of the iconoclast controversy and shows how it was only by this movement that Hellenistic naturalism was finally vanquished and the seed of interpretational art planted in Europe in its stead The third chapter reveals how this seed was nourished by the Constantinopolitan Renaissance and how that event combined with the increasing humanisation of religious emotion culminated not only in Duccio and Giotto but in the equally important work of their contemporaries at Mistra and Mount Athos A detailed account of these works is given and in the last part of the book the mystery of El Greco is finally resolved The book is based not only on extensive research but on personal observation of nearly all the works mentioned in Constantinople Greece Crete Italy and Spain It is an important and exciting addition to the history of European Art and establishes scientifically theories which only existed in conjecture before its publication The book includes 94 black and white plates **Masterpieces of Western Art** Robert Suckale, 2002 This volume traces the history of painting from medieval times to modern times with a focus on each era and its major artists This volume traces the history of painting from medieval times to modern times with a focus on each era and its major artists Western Art and the New Era Katherine Sophie Dreier, 1923 **Vision, Reflection, and Desire in Western Painting** David Summers, 2015-12-01 Spanning more than 2 500 years in the history of art Vision Reflection and Desire in Western Painting

demonstrates how the rise and diffusion of the science of optics in ancient Greece and the Mediterranean world correlated to pictorial illusion in the development of Western painting from Hellenistic Greece to the present Using examples from the late Middle Ages and the Renaissance David Summers argues that scene painting architectural backdrops and shadow painting in which forms are modeled or shown as if in relation to a source of light not only evolved in close association with geometric optics toward the end of the fifth century B C E but also contributed substantially to the foundations of the new science The spread of understanding of how light is transmitted reflected and refracted is evident in the works of artists such as Brunelleschi van Eyck Alberti and Leonardo The interplay between optics and painting that influenced the course of Western art Summers says persisted as a framework for the realism of Caravaggio Rembrandt and Goya and continues today in modern photography and film
