## **The Making Of Australia The Ice Age:**

**Australia's Greatest Inventions** Lynda De Lacey, 2010-07-30 Australia's Greatest Inventions From boomerangs to the Hills Hoist by Lynda de Lacey Australia has a reputation for innovation and inventiveness that famous tie it up with fence wire attitude towards getting things done is one of our best known national characteristics Popular opinion tells us that a knack for adaptation for jerry rigging and so called bush improvisation is one of the qualities that marks us out as Australian If you had to play spot the Australian among other nationalities you'd choose the ones with the duct tape and pliers in their hands But ask your average Aussie to reel off a list of uniquely Australian inventions at a pub trivia night and most won't get much further than the stump jump plough the Hills Hoist Speedos and the pavlova Suddenly you may find yourself wondering if we're all that inventive as a culture after all These examples certainly don't seem to build a terribly convincing case This book proves that for a 200 year old culture with a relatively small population Australians have a much richer inventive history than we give ourselves credit for Once we've seen that this reputation for inventiveness is justified the next question becomes is there something in our cultural wiring something about being Australian that makes us more inventive than other people

**Australia's Remarkable Places** Frances Payne, 2020-02-27 Where can you go to see what the Earth might have looked like billions of years ago Outback Australia has some of the oldest landscapes in the world with meteor craters that cover tens of kilometres In this book you will also discover the ghost towns and underground communities that all help to make Australia such an interesting place to live or visit How much do you really know about Australia Did you know that the whole continent is on the move or that Aussies were the first to use penicillin Dip in anywhere throughout this series to find masses of mini articles on everything you could want to know about Australia

**Corridors to Extinction and the Australian Megafauna** Steve Webb, 2013-02-27 Extinctions have always occurred and always will so what is so surprising about the megafauna extinctions They were caused by humans and were the first of many extinctions that eventually led to the extinction of the Moa Steller's Sea Cow the Dodo Great Auk and countless other species great and small all attributed to human agency Therefore the megafauna were humans first great impact on the planet There is now an increasing realization that the blitzkrieg view of these extinctions may have been wrong A growing body of evidence and long term field work is beginning to show that at least Australia's megafauna did not succumb to human agency not because humans probably did not hunt the odd animal but because the an infinitely more logical reason lies in the climatic conditions of the Quaternary Ice Ages and the affect they had on continental geography environment climate and most importantly the biogeography of the megafauna This book presents the evidence of this theory demonstrating the biogeographic approach to Australia's megafauna extinction Written clearly to benefit a diverse level of readers from those with a passing interest to professionals in the field Examines future climate change and its effects on the planet by looking at examples buried in the past Presents new evidence from extensive field research
