The Making Of Black White:

Evidence of Things Not Seen Rhonda D. Frederick, 2022-07-15 *Evidence of Things Not Seen* is an interdisciplinary study of blackness in genre literature of the Americas When mystery romance fantasy mixed genre and science fiction writers center fantastical blackness they make this expressive quality available to a broad audience that uses pop fictions imaginable vocabularies to reshape extra literary realities Ultimately popular genres imaginable possibilities help us strategize ways that the made up can be made real

Black, White, and Catholic R. Bentley Anderson, 2005 *New Orleans Catholics and the early years of desegregation*

Black Over White Thomas Holt, 1979 In this prize winning book Thomas Holt is concerned not only with the identities of the black politicians who gained power in South Carolina during Reconstruction but also with the question of how they functioned within the political system Thus as one reviewer has commented he penetrates the superficial preoccupations over whether black politicians were venal or gullible to see whether they wielded power and influence and if they did how and to what ends and against what obstacles Well crafted and well written it not only broadens our knowledge of the period but also deepens it something that recent books on Reconstruction have too often failed to do

Michael Perman *American Historical Review* a valuable study of post Civil War black leaders in a state where Negro control came closest to realization during Reconstruction Effectively merging the techniques of quantitative analysis with those of narrative history Holt shatters a number of myths and misconceptions It should be on the reading list of all students of Reconstruction and nineteenth century black history

William C Harris *Journal of Southern History* Holt presents his work modestly as a state study of reconstruction politics But this should not obscure a significant intellectual achievement and a contribution of fundamental importance demonstrating the value of social class analysis in understanding the politics of the black community

Jonathan M Wiener *Journal of American History*

The What-not; or Ladies' handy-book, 1861 **Defending the American Way of Life** Kevin B. Witherspoon, 2018-12-01 Winner 2019 NASSH Book Award Anthology The Cold War was fought in every corner of society including in the sport and entertainment industries. Recognizing the importance of culture in the battle for hearts and minds, the United States like the Soviet Union attempted to win the favor of citizens in nonaligned states through the soft power of sport. Athletes became de facto ambassadors of US interests; their wins and losses serving as emblems of broader efforts to shield American culture both at home and abroad against communism. In *Defending the American Way of Life*, leading sport historians present new perspectives on high-profile issues in this era of sport history alongside research drawn from previously untapped archival sources to highlight the ways that sports influenced and were influenced by Cold War politics. Surveying the significance of sports in Cold War America through lenses of race, gender, diplomacy, cultural infiltration, anti-communist hysteria, doping, state intervention, and more, this collection illustrates how this conflict remains relevant to US sporting institutions, organizations, and ideologies today. *An Introduction to Statistical Problem Solving in Geography* J. Chapman McGrew, Jr., Charles B. Monroe, 2009-04-22 Written for undergraduate geography majors and entry-level graduate students with limited backgrounds in statistical analysis and methods, McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem

solving framework Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text Without compromising statistical rigor or oversimplifying the authors stress the importance of written narratives that explain each statistical technique After introducing basic statistical concepts and terminology the authors focus on nonspatial and spatial descriptive statistics They transition to inferential problem solving including probability sampling and estimation before delving deeper into inferential statistics for geographic problem solving The final chapters examine the related techniques of correlation and regression A list of major goals and objectives is included at the end of each chapter allowing students to monitor their own progress and mastery of geographic statistical materials An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation
