The Making Of Britain The Age Of Expansion:

The Making of Britain Lesley M. Smith,1986 *The Making of Britain* Lesley M. Smith,1986 **The Historian** ,1986

Europe and the World, 1650-1830 Professor Jeremy Black,Jeremy Black,2013-10-08 Europe and the World 1650 1830 is an important thematic study of the first age of globalisation It surveys the interaction of Europe Europe s growing colonies and other major global powers such as the Ottoman Empire China India and Japan Focusing on Europe s impact on the world Jeremy Black analyses European attitudes exploration trade and acquisition of knowledge *The Making of Britain* Lesley M. Smith,1987 **Ideology and Empire in Eighteenth-Century India** Robert Travers,2007-04-19 Robert Travers analysis

of British conquests in late eighteenth century India shows how new ideas were formulated about the construction of empire After the British East India Company conquered the vast province of Bengal Britons confronted the apparent anomaly of a European trading company acting as an Indian ruler Responding to a prolonged crisis of imperial legitimacy British officials in Bengal tried to build their authority on the basis of an ancient constitution supposedly discovered among the remnants of the declining Mughal Empire In the search for an indigenous constitution British political concepts were redeployed and redefined on the Indian frontier of empire while stereotypes about oriental despotism were challenged by the encounter with sophisticated Indian state forms This highly original book uncovers a forgotten style of imperial state building based on constitutional restoration and in the process opens up new points of connection between British imperial and South Asian history **The Making of the British Landscape** Francis Pryor,2010-06-03 This is the changing story of Britain as it has

been preserved in our fields roads buildings towns and villages mountains forests and islands From our suburban streets that still trace out the boundaries of long vanished farms to the Norfolk Broads formed when medieval peat pits flooded from the ceremonial landscapes of Stonehenge to the spread of the railways evidence of how man s effect on Britain is everywhere In *The Making of the British Landscape* eminent historian archaeologist and farmer Francis Pryor explains how to read these clues to understand the fascinating history of our land and of how people have lived on it throughout time Covering both the urban and rural and packed with pictures maps and drawings showing everything from how we can still pick out Bronze Age fields on Bodmin Moor to how the Industrial Revolution really changed our landscape this book makes us look afresh at our surroundings and really see them for the first time **A History of Sociology in Britain** A. H. Halsey,2004-03-18 This is

the first ever critical history of sociology in Britain written by one of the world s leading scholars in the field Renowned British sociologist A H Halsey presents a vivid and authoritative picture of the neglect expansion fragmentation and explosion of the discipline during the past century He is well equipped to write the story having lived through most of it and having taught and researched in Britain the USA and Europe The story begins with L T Hobhouse s election to the first chair in sociology in London in 1907 but traces earlier origins of the discipline to Scotland and the English provinces There is a lively account of the nineteenth century battles between literature and science for the possession of the third culture of social

studies setting the context for a narrative history of rapid expansion in the second half of the twentieth century LSE had a virtual monopoly before World War II The educational establishment of Oxford and Cambridge opposed its introduction into the undergraduate curriculum Only the expansion of sociology to the Scottish Welsh provincial and new universities after the Robbins Report of 1963 brought reluctant acceptance of the subject to Oxford and Cambridge The student troubles of 1968 are then described and the subsequent doubts confrontations and cuts of the 1970s and 80s Then paradoxically by a Conservative Government there was a new university expansion incorporating polytechnics and other colleges with a consequent doubling of both staff and students in the 1990s Yet the end of the century left sociology riven by intellectual conflict It had survived the Marxist subversions of the 70s and the feminist invasion Yet the renewed challenges of various forms of relativism especially ethno methodology and post modernism still threatened and at root the war was as it began between a scientific quantifying and explanatory subject and a literary interpretative set of cultural studies Britain in the Hanoverian Age, 1714-1837 Gerald Newman, Leslie Ellen Brown, 1997 In 1714 king George I ushered in a remarkable 123 year period of energy that changed the face of Britain and ultimately had a profound effect on the modern era The pioneers of modern capitalism industry democracy literature and even architecture flourished during this time and their innovations and influence spread throughout the British empire including the United States Now this rich cultural period in Britain is effectively surveyed and summarized for quick reference in a first of its kind encyclopedia which contains entries by British Canadian American and Australian scholars specializing in everything from finance and the fine arts to politics and patent law More than 380 illustrations mostly rare engravings enhance the coverage which runs the whole gamut of political economic literary intellectual artistic commercial and social life and spotlights some 600 prominent individuals and families

Islands and the British Empire in the Age of Sail Douglas Hamilton, John McAleer, 2021 Islands are not just geographical units or physical facts their importance and significance arise from the human activities associated with them The maritime routes of sailing ships the victualling requirements of their sailors and the strategic demands of seaborne empires in the age of sail as well as their intrinsic value as sources of rare commodities meant that islands across the globe played prominent parts in imperial consolidation and expansion This volume examines the various ways in which islands and groups of islands contributed to the establishment extension and maintenance of the British Empire in the age of sail Thematically related chapters explore the geographical topographical economic and social diversity of the islands that comprised a large component of the British Empire in an era of rapid and significant expansion Although many of these islands were isolated rocky outcrops they acted as crucial nodal points providing critical assistance for ships and men embarked on the long distance voyages that characterised British overseas activities in the period Intercontinental maritime trade colonial settlement and scientific exploration and experimentation would have been impossible without these oceanic islands They also acted as sites of strategic competition contestation and conflict for rival European powers keen to outstrip

each other in developing and maintaining overseas markets plantations and settlements The importance of islands outstripped their physical size the populations they sustained or their individual economic contribution to the imperial balance sheet Standing at the centre of maritime routes of global connectivity islands offer historians of the British Empire fresh perspectives on the intercontinental communication commercial connections and territorial expansion that characterised that empire
