Trade in Sixteenth-Century France** Susan Broomhall, 2018-11-07 Focusing on the vastly understudied area of how women
participated in the book trades not just as authors but also as patrons copyists illuminators publishers editors and readers
Women and the Book Trade in Sixteenth Century France foregrounds contributions made by women during a period of
profound transformation in the modes and understanding of publication Broomhall asks whether women's experiences as
authors changed when manuscript circulation gave way to the printed book as a standard form of publication Innovatively
she broadens the concept of publication to include methods of scribal publication through the circulation and presentation of
manuscripts and expands notions of authorship to incorporate a wide sample group of female writers and publishing

experiences She challenges the existing view that manuscript offered a safe means of semi public exposure for female authors and explores its continuing presence after the introduction of print The study introduces a wide and rich range of unexamined sources on early modern women using an extensive range of manuscripts and the entire corpus of women s printed texts in sixteenth century France Most of the original texts uncovered during the author s own extensive archival and bibliographical research have never been re published in modern French Most of the citations from them are here translated into English for the first time The work presents the only checklist of all known women s writings in printed texts from prefaces and laudatory verse to editions of prose and poetry between 1488 and 1599 Women and the Book Trade in Sixteenth Century France constitutes the most comprehensive assessment of women s contribution to contemporary publishing yet available Broomhall s innovative approach and her conclusions have relevance not only for book historians and French historians but for a broad range of scholars who work with other European literatures and histories as well as women s studies

The Two Finger Diet Benjamin A Straight,2005-03-23 In The Two Finger Diet How the Media Has Duped Women into Hating Themselves author Benjamin Straight delivers a compelling sociological examination of how the American media advertises to women a key marketing demographic ruthlessly targeted since 1870 The author traces the historical roots of this phenomenon and its development to the present carefully scrutinizing the manipulative tactics companies have constructed to pitch the beauty myth to American women His research addresses myriad themes on the commodification of American women including What is the perfect female physique and who is defining it What institutions that have emerged to combat the obesity plague and provide products for aesthetic enhancement Straight ultimately concludes that the image of the ideal female is purposefully unattainable and leads to a malady of personal and social problems these include eating disorders excessive and damaging financial expenditures and lives diminished by a sense of inadequacy Furthermore much of their liberty is mere illusion their happiness is largely defined and constricted by media and advertising paradigms attempting to make American women feel inferior in order to sell them products As such American women will not be truly liberated until they break from the corporate bottom line

Child-birth; Or, The Happy Delivery of Women Jacques Guillemeau,1635

The "new Woman" Revised Ellen Wiley Todd,1993-01-01 In the years between the world wars Manhattan s Fourteenth Street Union Square district became a center for commercial cultural and political activities and hence a sensitive barometer of the dramatic social changes of the period It was here that four urban realist painters Kenneth Hayes Miller Reginald Marsh Raphael Soyer and Isabel Bishop placed their images of modern new women Bargain stores cheap movie theaters pinball arcades and radical political organizations were the backdrop for the women shoppers office and store workers and consumers of mass culture portrayed by these artists Ellen Wiley Todd deftly interprets the painters complex images as they were refracted through the gender ideology of the

period This is a work of skillful interdisciplinary scholarship combining recent insights from feminist art history gender studies and social and cultural theory Drawing on a range of visual and verbal representations as well as biographical and critical texts Todd balances the historical context surrounding the painters with nuanced analyses of how each artist's image of womanhood contributed to the continual redefining of the new woman's relationships to men family work feminism and sexuality

The Religious Dimensions of Advertising T. Sheffield, 2006-11-13 This groundbreaking work explores media scholar Sut Jhally's thesis that advertising functions as a religion in late capitalism and relates this to critical theological studies Sheffield argues that advertising is not itself a religion but that it contains religious dimensions analogous to Durkheim's description of objects as totems
