SignGram Blueprint Josep Quer, Carlo Cecchetto, Caterina Donati, Carlo Geraci, Meltem Keleşir, Roland Pfau, Markus Steinbach, 2017-11-20 We gratefully acknowledge the financial support of COST European Cooperation in Science and Technology funded by the Horizon 2020 Framework Programme of the European Union Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability and it appears scattered in scientific publications where the description is often intertwined with the analysis In general comprehensive grammars are a rarity The SignGram Blueprint is an innovative tool for the grammar writer a full fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way and with the highest scientific standards The work builds on the existing knowledge in Descriptive Linguistics but also on the insights from

Theoretical Linguistics It consists of two main parts running in parallel the Checklist with all the grammatical features and phenomena the grammar writer can address and the accompanying Manual with the relevant background information definitions methodological caveats representative examples tests pointers to elicitation materials and bibliographical references The areas covered are Phonology Morphology Lexicon Syntax and Meaning The Manual is endowed with hyperlinks that connect information across the work and with a pop up glossary The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity Knowledge Structures James A. writers to approach their own work with an informed understanding of dramatic architecture Each self contained chapter focuses on one storytelling component ranging from Title and Main Event to Emotional Environment and Crisis Decision Dunne explores each component in detail demonstrating how it has been successfully handled in each play and comparing and contrasting techniques The chapters conclude with questions to help writers evaluate and improve their own scripts The result is a nonlinear reference guide that lets writers work at their own pace and choose the topics that interest them as they develop new scripts This flexible interactive structure is designed to meet the needs of writers at all stages of writing and at all levels of experience
