The Making Of Virginia Architecture:

The Making of Virginia Architecture Charles E. Brownell, 1993 The Making of Virginia Architecture Charles E. Brownell, 1992 The long tradition of architecture in Virginia begins with the earliest structures at the Jamestown settlement in 1607 and continues today with some of the most advanced buildings yet completed anywhere In its legendary landmarks Mount Vernon Monticello the Virginia Capitol building in Richmond the James River plantation mansions the Reynolds Metals headquarters building in Richmond Washington National Airport and Dulles International Airport as well as in homes churches stores and office buildings across the state Virginia s architecture is a mirror of the many expressions of America s built environments This book invites the readers on a journey through the eye and mind of the architect from the very drawings that give shape and form to the idea through the tracks and traces found in long lost letters office records and other primary sources You will never see the buildings around you anywhere in the same way again From publisher s description Architecture in the United States Dell Upton, 1998 From Native American sites in New Mexico and Arizona to the ancient earthworks of the Mississippi Valley to the most fashionable contemporary buildings of Chicago and New York American architecture is incredibly varied In this revolutionary interpretation Upton examines American architecture in relation to five themes community nature technology money and art 109 illustrations 40 linecuts Map 10 Buildings That Changed America Dan Protesse, 2013-05-14 10 Buildings that Changed America tells the stories of ten influential works of architecture the people who imagined them and the way these landmarks ushered in innovative cultural shifts throughout our society The book takes readers on a journey across the country and inside these groundbreaking works of art and engineering The buildings featured are remarkable not only for aesthetic and structural reasons but also because their creators instilled in them a sense of purpose and personality that became reflected in an overarching sense the American identity Edited by the staff of WTTW the Chicago PBS affiliate that is the most watched public television station in the country 10 Buildings will be released alongside the national broadcast of an hour long special by the same name This television event will be promoted over digital media on ground events and educational initiatives in schools and the book will be a significant component to all of these elements 10 Buildings retells the shocking funny and even sad stories of how these buildings came to be It offers a peek inside the imaginations of ten daring architects who set out to change the way we live work and play From American architectural stalwarts like Louis Sullivan and Frank Lloyd Wright to modern revolutionaries like Frank Gehry and Robert Venturi this book examines the most prominent buildings designed by the most noteworthy architects of our time Also profiled are Americans less noted for their architectural acumen but no less significant for their contributions to the field Thomas Jefferson a self taught architect is profiled for designing the iconic Virginia State Capitol Taking its inspiration from ancient Rome America s first major public building forged a philosophical link between America and the world s earliest democracies Similarly Henry Ford employed Albert Kahn to design a state of the art innovative

factory for Ford's groundbreaking assembly line. Reinforced concrete supported massive open rooms without any interior dividing walls which yields the uninterrupted space that was essential for Ford's sprawling continuous production setups. What's more, Kahn considered the needs of workers by including astonishingly modern large windows and louvers for fresh air. The design of each of these ten buildings was completely monumental and prodigious in its time because of the architect's stylistic or functional innovations. Each was also highly influential, inspiring a generation or more of architects who in turn made a lasting impact on the American landscape. We see the legacy of architects like Mies van der Rohe or H. H. Richardson all around us in the homes where we live, the offices where we work, our public buildings and our houses of worship. All have been shaped in one way or another by a handful of imaginative, audacious and sometimes even arrogant individuals throughout history whose bold ideas have been copied far and wide. 10 Buildings is the ideal collection to detail the flashes of inspiration from these architects who dared to strike out on their own and design radical new types of buildings that permanently altered our environmental and cultural landscape.

American Gothic Art and Architecture in the Age of Romantic Literature Kerry Dean Carso, 2014-11-15. American Gothic Art and Architecture in the Age of Romantic Literature analyses the influence of British Gothic novels and historical romances on American art and architecture in the Romantic era.

Architecture's Appeal Marc Neveu, Negin Djavaherian, 2015-02-11. This collection of previously unpublished essays from a diverse range of well-known scholars and architects builds on the architectural tradition of phenomenological hermeneutics as developed by Dalibor Vesely and Joseph Rykwert and carried on by David Leatherbarrow, Peter Carl and Alberto Pérez Gómez. Taking an interdisciplinary approach and drawing on ideas from beyond the architectural canon, contributors including Kenneth Frampton, David Leatherbarrow, Juhani Pallasmaa, Karsten Harries, Steven Holl, Indra Kagis McEwen, Paul Emmons and Louise Pelletier offer new insights and perspectives on questions such as the following: Given the recent fascination with all things digital and novel, what is the role of history and theory in contemporary architectural praxis? Is authentic meaning possible in a technological environment that is so global and interconnected? What is the nature and role of the architect in our shared modern world? How can these questions inform a new model of architectural praxis? *Architecture's Appeal* is a thought-provoking book which will inspire further scholarly inquiry and act as a basis for discussion in the wider field as well as graduate seminars in architectural theory and history.

Virginia's Historic Courthouses Margaret T. Peters, 1995. They examine historic structures ranging from the Essex County courthouse 1729 and the King William County courthouse built ca 1725 and one of the oldest public buildings in continuous use in the nation to the newer historic courthouses such as Richmond's massive Supreme Court State Library Building dedicated in 1941.
