Computational and Experimental Approaches on Soft Tissues Biomechanics and Mechanobiology Lei Fan, Ge He, Lei Wang, Yih-Kuen Jan, 2025-06-19 Soft tissues which encompass all organs of the body such as the brain muscles and tendons play a crucial role in maintaining the normal function in the human body Understanding the biomechanics and mechanobiology of these tissues by integrating computational and experimental approaches is essential for advancing the clinical treatments medical device development and overall healthcare This topic outlines multidisciplinary research on understanding soft tissues biomechanics and mechanobiology under various physiological and pathological conditions The proposed topic aims to combine experimental and computational methods to gain insights into the complex mechanical behaviors of soft tissues To achieve this goal this Research Topic will focus on some specific objectives like developing novel computational models to elucidate soft tissue behavior and quantifying the effects of diseases characterizing soft tissue properties by advancing experimental techniques such as tissue testing imaging and microscale analysis This will help in characterizing the mechanical properties and structural behavior of various soft tissues under both physiological and pathological conditions We welcome the studies that investigate mechanobiological processes such as tissue remodeling adaption and injury by integrating computational models with experimental data to gain insights into mechanical behavior The studies that apply the findings from this research to improve clinical applications such as subject specific treatment development of medical devices and regenerative medicine This topic will also cover the interdisciplinary research by integrating biomechanics biology engineering clinical studies and imaging techniques Computational modeling development Machine learning applications Experimental characterization Imaging processing techniques Mechanobiological processes Disease mechanisms Application in clinical treatments and medical devices Evidence-Based Procedural Dermatology Murad Alam, 2011-11-19 In Evidence Based Procedural Dermatology Dr Alam has compiled the subspecialty's latest research findings in a reference for researchers and dermatologists It covers the spectrum of procedural dermatology including skin cancer surgery laser techniques fillers and neurotoxins minimally invasive cosmetic surgery and emerging procedures Leading experts present and evaluate evidence in each subfield providing a solid manual for the present and a guide for research in the future Features A numerical system to appraise research findings used throughout the book Question and answer section to reinforce knowledge at the end of most chapters Serves as a tutorial for those interested in performing clinical research Holds practical value for dermatologists who are treating or counseling patients *Dispersed Dispossession* Alexander Vorbrugg, 2025-07-01 This book provides a nuanced analysis of rural change in Russia during the 2010s a crucial and formative phase marked by the consolidation of giant agricultural companies large land deals soaring exports and spectacular failures of investment projects It contextualizes complex and often ambivalent empirical realities within historical and political economic frameworks Through extensive fieldwork Alexander Vorbrugg gives rare insights into

the operations of large agricultural companies and reveals how the deterioration of material infrastructures social arrangements government and local supports and collective goods erode the conditions of rural inhabitants well being and agency Vorbrugg introduces dispersed dispossession a concept that helps to relate gradual degradation to appropriation and agency The concept captures losses that have been accumulated across Soviet reform and state capitalist phases and stick to places persons and potentialities These losses are perpetuated and exploited by businesses and politicians and have profound implications for the conditions for resistance shaping the range of conceivable alternatives They are part of a history that is not fully past
