The Smithsonian's History of America in 101 Objects Richard Kurin, 2016-10-25 The Smithsonian Institution is America's largest most important and most beloved repository for the objects that define our common heritage Now Under Secretary for Art History and Culture Richard Kurin aided by a team of top Smithsonian curators and scholars has assembled a literary exhibition of 101 objects from across the Smithsonian's museums that together offer a marvelous new perspective on the history of the United States Ranging from the earliest years of the pre-Columbian continent to the digital age and from the American Revolution to Vietnam each entry pairs the fascinating history surrounding each object with the story of its creation or discovery and the place it has come to occupy in our national memory Kurin sheds remarkable new light on objects we think we know well from Lincoln's hat to Dorothy's ruby slippers and Julia Child's kitchen including the often astonishing tales of how each made its way into the collections of the Smithsonian Other objects will be eye-opening new discoveries for many but no less evocative of the most poignant and important moments of the American experience Some objects such as Harriet Tubman's hymnal Sitting Bull's ledger Cesar Chavez's union jacket and the Enola Gay bomber tell difficult stories from the nation's history and

inspire controversies when exhibited at the Smithsonian Others from George Washington's sword to the space shuttle Discovery celebrate the richness and vitality of the American spirit In Kurin's hands each object comes to vivid life providing a tactile connection to American history Beautifully designed and illustrated with color photographs throughout The Smithsonian's History of America in 101 Objects is a rich and fascinating journey through America's collective memory and a beautiful object in its own right

Colony and Empire William G. Robbins, 1994 Popular writers and historians alike have perpetuated the powerful myth of the rugged individualist single handedly transforming the American West In reality William Robbins counters it was the Guggenheims and Goulds the Harrimans and Hearsts and the Morgans and Mellons who masterminded what the West was to become Remove the romance he shows and a darker West emerges a colonial like region where industrial statesmen aided by eastern U S and European capital manipulated investments in pursuit of private gain while controlling wage earning cowboys and miners Robbins argues that understanding the impact of capitalism on the West from the fur trade era to the present is essential to understanding power influence and change in the region Showing how global capitalism had a more profound impact on the modern West than individual initiative he explores violence and racism along the Texas Mexican border colonial style company towns in Montana and the Northwest contrasting traditions astride the U S Canadian boundary pace setting agribusiness and exploitation of labor in California the growing power of metropolitan centers and dependence of rural areas and the emergence of a sizable federal influence To grasp the essence of the West's dramatic transformation Robbins contends you must look to the mainstays of material relations in the region the perpetually changing character of political and economic culture the inherent instability of resources and the larger constellations of capitalist decision making Consequently he shows shy Western success and failure prosperity and misfortune and expansion and decline were all inseparably linked to the evolution of capitalism at the local regional national and global levels In the tradition of Patricia Nelson Limerick's *Legacy of Conquest* Robbins's study challenges some of our most revered images of the West and invigorates the ongoing debates over its history and meaning for our nation
