, **Maps and Territories** Joshua Armstrong, 2019 The rapidity of postwar globalization and the structural changes it has brought to both social and spatial aspects of everyday life has meant in France as elsewhere the destabilizing of senses of place identity and belonging as once familiar local environments are increasingly de localized and made porous to global trends and planetary preoccupations Maps and Territories identifies such preoccupations as a fundamental underlying impetus for the contemporary French novel Indeed like France itself the protagonists of its best fiction are constantly called upon to renegotiate their identity in order to maintain any sense of belonging within the troubled territories they call home Maps and Territories reads today s French novel for how it re maps such territories and for how it positions its protagonists vis vis the pressures of globalization uncovering previously unseen affinities amongst and offering fresh readings of and offering exciting new perspectives on a diverse set of authors namely Michel Houellebecq Chlo Delaume Lydie Salvayre Jean Philippe Toussaint Virginie Despentes Philippe Vasset Jean Rolin and Marie Darrieussecq In the process it sets the literary works into dialogue with a range of today s most influential theorists of postmodernity and globalization including Paul Virilio Marc Aug Peter Sloterdijk Bruno Latour Fredric Jameson Edward Casey David Harvey and Ursula K Heise

The Haitian Media System and its Main Characteristics: A Model of the Precarious System of Democratic Transition Wisnique Panier, 2023-06-26 This book presents a new theoretical model of a media system called the model of the precarious system of democratic transition The latter is based on fifteen parameters that characterize the Haitian media system and the environment in which it evolves This is a significant contribution to advancing knowledge in media studies and public communication in general After carefully analyzing different models of media systems existing in the scientific literature including the three models proposed by Halin and Mancini 2004 the author concludes that none of them applies to the typical Haitian case His study confirms the limitations of media system models resulting from Halin and Mancini s comparative studies in the context of Western countries It is a real reference document that gives an unprecedented reading grid to analyze the media systems of non Western countries particularly African or Latin American countries which have characteristics similar to that of Haiti Indeed in his doctoral thesis the author concluded that the Haitian media system has transformed over the past 60 years under the influence of three sets of factors linguistics democratic and technological Nevertheless he comes to the conclusion that the changes observed are only in the relations between the actors of the system without leading to a reconfiguration of the system The main characteristics of the Haitian media system and its environment remained unchanged from 1957 to 2022 So there is an inertia that keeps the system in an initial state

Protean Selves Adrienne Angelo, 2014-08-20 What does it mean to write I in postmodern society in a world in which technological advances and increased globalization have complicated notions of authenticity origins and selfhood Under what circumstances and to what extent do authors lend their scriptural authority to fictional counterparts What role does naming or conversely

anonymity play vis vis the writing and written I What aspects of identity are subject to auto fictional manipulations And how do these complicated and multilayered narrating selves problematize the reader s engagement with the text Seeking answers to these questions Protean Selves brings together essays which explore the intricate relations between language self identity otherness and the world through the analysis of the forms and uses of the first person voice Written by specialists of a variety of approaches and authors from across the world the studies in this volume follow up a number of critical inquiries on the thorny problematic of self representation and the representation of the self in contemporary French and francophone literatures and extend the theoretical analysis to narratives and authors who have gained increasing commercial and academic visibility in the twenty first century

[Fin de millénaire French Fiction](#) Ruth Cruickshank,2009-10-08

The turn of the millennium in France coincided with a number of tangible crises and apocalyptic discourses and with the growth of the mass media and global market further generating and manipulating crisis In this original wide ranging but closely analytical study Cruickshank contextualizes and reads the work of four influential writers of prose fiction Angot Echenoz Houellebecq and Redonnet teasing out each one s response to this convergence She suggests that the recurrent fictional and cultural trope of the turning point has both aesthetic and critical potential Bringing together analyses spanning literature thought and culture she identifies and critiques the ways in which on the eve of the twenty first century different theoretical and fictional approaches confront the manipulation of crisis discourses Drawing on a long twentieth century of crisis thinking Cruickshank counters the perception that a postmodern model of perpetual crisis is culturally dominant and establ
