Haberman, 1998 A superb introduction to the timeless struggle to understand human nature this book compresses into a small volume the essence of such thinkers as Karl Marx Sigmund Freud Jean Paul Sartre B F Skinner and Plato **Thirteen Theories of Human Nature** Leslie Forster Stevenson, 2017 *What Is a Person?* Christian Smith, 2010-09-15 What is a person This fundamental question is a perennial concern of philosophers and theologians But Christian Smith here argues it also lies at the center of the social scientist's quest to interpret and explain social life In this ambitious book Smith presents a new model for social theory that does justice to the best of our humanistic visions of people life and society Finding much current thinking on personhood to be confusing or misleading Smith finds inspiration in critical realism and personalism Drawing on these ideas he constructs a theory of personhood that forges a middle path between the extremes of positivist science and relativism Smith then builds on the work of Pierre Bourdieu Anthony Giddens and William Sewell to demonstrate the importance of personhood to our understanding of social structures From there he broadens his scope to consider how we can know what is good in personal and social life and what sociology can tell us about human rights and dignity Innovative critical and constructive *What Is a Person* offers an inspiring vision of a social science committed to pursuing causal explanations

Al-Rodhan, 2022-01-01 What makes us who we are Are we born good or evil Do we have free will What drives our behaviour and why Can technology change what it means to be human In this thoroughly revised second edition of *Emotional Amoral Egoism* Professor Nayef Al Rodhan demonstrates the impact of our innate predispositions on key issues from conflict inequality and transcultural understanding to Big Data fake news and the social contract However it is the societies we live in and their governance structures that largely determine how we act on our innate predispositions Consequently Al Rodhan proposes a new and sustainable good governance paradigm which must reconcile the ever present tension between the three attributes of human nature *Emotional Amoral Egoism* and the nine critical needs of human dignity This book is a perfect resource for enlightened readers academics and policy makers interested in how our innate instincts and tendencies shape the world we live in and how the interplay between neurophilosophy and policy can be harnessed for pragmatic and sustainable peace security and prosperity solutions for all at all times and under all circumstances

Humanity Ken Bazyn, 2019-01-16 How can one do justice to the heights and depths of the human condition its mind boggling accomplishments its horrid corruptions Christian tradition in its wisdom has acknowledged both extremes We are fallible amphibians composed of matter and spirit yet capable of intense communication with God Bazyn poetically expands on and dissects the conundrums Frustrations dog our every step and cravings overthrow us repeatedly Why are we so prone to duplicity to prejudice What causes us to explode in anger retreat into superficiality see only the short term Why do we mistreat and ridicule others e.g. the poor minorities women Free will itself can create saints or antiheroes Rich in vocabulary dense in allusions far ranging in insight at times aphoristic in style these poems are the outpourings of anguished authenticity What message is our town bell pealing today Why are there flaws beneath the smoothest of surfaces How is it that we so often follow a zigzag course If revelation comes it may blind us or shine but a dim shadowy half light Bazyn's spontaneous undoctored black and white images clarify and add nuance to each vital topic As Augustine forthrightly acknowledged in Confessions I have become a puzzle to myself **Sustainable History and Human Dignity** Nayef R.F. Al-Rodhan, 2022-01-01 In Sustainable History and Human Dignity Professor Nayef Al Rodhan shows that it is the human quest for sustainable governance balancing the ever present tension between nine human dignity needs and three human nature attributes emotionality amorality egoism that has and will most profoundly shape the course of history Beginning with an Ocean Model of a single collective human civilisation Al Rodhan constructs a common human story comprised of multiple geo cultural domains and sub cultures with a history of mutual borrowing and synergies If humanity as a whole is to flourish all of these diverse geo cultural domains must succeed Only thus can lasting peace and prosperity be achieved for all especially in the face of Civilisational Frontier Risks and highly disruptive technologies in the twenty first century **Who Do I Say That You Are?** William Schumacher, 2010-01-04 The question of what it means to be a human creature lies at the heart of contemporary wrestling with anthropology and especially anthropology from a theological perspective Through both historical and systematic engagement with the so called Finnish school of Tuomo Mannermaa this study explores and assesses the anthropological dimension of their theology of theosis or deification Mannermaa initiated a minor revolution in Luther studies and in contemporary Lutheran theology by interpreting Luther's doctrine of justification to be a close analog

to the Eastern Orthodox doctrine of theosis but his ecumenical interests led him to minimize or overlook key themes in Luther and sharp distinctions between Luther and Orthodox theologians Mannermaa's colleague Simo Peura then developed this thesis with specific reference to anthropology in a way reminiscent of the sixteenth century reformer Andreas Osiander On closer inspection the project of Mannermaa and his Finnish colleagues fails to understand adequately both Luther's sources and his own theological development In this study a theological anthropology which is more consistent with Luther's theology is developed an anthropology which is determined by God's address to his human creatures what God himself says we are and what he makes us by that word Such an answer to the anthropological question refuses to flee from creation but instead upholds the complex and paradoxical nature of human beings as creatures sinners and saints **Human Beings in**

International Relations Daniel Jacobi, Annette Freyberg-Inan, 2015-09-11 Asks how why and to what ends humans appear in international relations theories and how this makes us interpret world politics **African American Christian Ethics**

Samuel K. Roberts, 2008-09-01 In African American Christian Ethics Samuel K Roberts builds an ethic upon a Trinitarian foundation and explores scripture tradition human experience and reason as sources for such an ethic Using this framework he examines critical issues including human sexuality and family life medicine and bio ethics and the pursuit of justice

Ehrlich, 2001-12-31 Why do we behave the way we do Biologist Paul Ehrlich suggests that although people share a common genetic code these genes do not shout commands at us at the very most they whisper suggestions He argues that human nature is not so much result of genetic coding rather it is heavily influenced by cultural conditioning and environmental factors With personal anecdotes a well written narrative and clear examples *Human Natures* is a major work of synthesis and scholarship as well as a valuable primer on genetics and evolution that makes complex scientific concepts accessible to lay readers
