the connections between the past present and future This shows the fascinating spatio temporal identity constructions in medieval Ireland and links the Irish texts to the broader European world The monograph makes this rich literary sources available to an interdisciplinary audience and is of interest to both a general medievalist audience and those working in Cultural Memory Studies **What Happened? Beyond the Archive Jens Brockmeier, 2015 Our longstanding view of memory and remembering is in the midst of a profound transformation This transformation does not only affect our concept of memory or a particular idea of how we remember and forget it is a wider cultural process In order to understand it one must step back and consider what is meant when we say memory Brockmeier's far ranging studies offer such a perspective synthesizing understandings of remembering from the neurosciences humanities social studies and in key works of autobiographical literature and life writing His conclusions force us to radically rethink our very notion of memory as an archive of the past one that suggests the natural existence of a distinctive human capacity or a set of neuronal systems enabling us to encode store and recall past experiences Now propelled by new scientific insights and digital technologies a new picture is emerging It shows that there are many cultural forms of remembering and forgetting embedded in a broad spectrum of human activities and artifacts This picture is more complex than any notion of memory as storage of the past would allow Indeed it comes with a number of alternatives to the archival memory one of which Brockmeier describes as the narrative approach The narrative approach not only permits us to explore the storied weave of our most personal form of remembering that is the autobiographical it also sheds new light on the interrelations among memory self and culture

culture and personhood through the bodily experiences and medical choices of patients Through case studies of patients in the context of medical pluralism Kristensen argues that medical practices are powerful social symbol indicative of overarching socio political processes As certain types of extreme and violent experiences known as olvidos lack a framework that allows them to be expressed openly they therefore surface as symptoms of an illness often with no apparent organic pathology In these contexts indigenous medicine thanks to its sensitivity to socio political contexts provides a space for articulation and management of collective experiences and suffering among patients in Southern Chile Cultural Memories of Nonviolent Struggles A.
