History in Times of Unprecedented Change Zoltán Boldizsár Simon,2019-06-13 Our understanding of ourselves and the world as historical has drastically changed since the postwar period yet this emerging historical sensibility has not been appropriately explained in a coherent theory of history In this book Zolt n Simon argues that instead of seeing the past the present and the future together on a temporal continuum as history we now expect unprecedented change to happen in the future in visions of the future of technology ecology and nuclear warfare and we look at the past by assuming that such changes have already happened This radical theory of history challenges narrative conceptualizations of history which assume a past potential of humanity unfolding over time to reach future fulfillment and seeks new ways of conceptualizing the altered socio cultural concerns Western societies are currently facing By creating a novel set of concepts to make sense of our altered historical condition regarding both history understood as the course of human affairs and historical writing History in Times of Unprecedented Change offers a highly original and engaging take on the state of history and historical theory in the present and beyond
